compatibility of tax amnesties with international agreements in particular the Treaty of the European Community As the renowned international tax expert Brian Arnold L71 observes in the work s foreword The book is an important contribution to the literature on tax amnesties as there is no comparable source dealing with the topic It is timely because the elimination of bank secrecy and the proliferation of Tax Information Exchange Agreements with tax havens have led several countries to adopt tax amnesty programs

integration does not stop at the frontiers of the European Union. Many non EU based enterprises are carrying on business in the European Union through the operation of branches or subsidiaries established in EU Member States and a large number of EU based enterprises maintain a diversified range of investments outside the Union. Accordingly in both inward and outward investment relationships economic openness is key nowadays. This legal relationship between EU Member States and the EU as a whole vis vis the rest of the world is the starting point of this book. The author analyses the freedom of investment concept between EU Member States and non EU States under EU law and specifically its effect on company taxation regimes from the perspective of multinational enterprises. Focusing on the impact of the Treaty freedoms and international integration agreements on relations with non EU Member States this work is the first to specifically address the all important issue. Under which circumstances can investment related rights deriving from EU law be invoked by companies established in non EU states. The analysis identifies the impact of the EU Treaty freedoms on six basic corporate income tax themes that are of particular interest for multinational enterprises: limitation on the deduction of interest expenses, withholding taxes on dividend interest and royalty payments, relief for double taxation of income received from foreign investments, CFC legislation, non deduction of foreign losses from the domestic taxable base and company taxation upon the transnational transfer of business assets.
