The Ancient Economy Joseph Gilbert Manning, Ian Morris, 2005 Historians and archaeologists normally assume that the economies of ancient Greece and Rome between about 1000 BC and AD 500 were distinct from those of Egypt and the Near East However very different kinds of evidence survive from each of these areas and specialists have as a result developed very different methods of analysis for each region This book marks the first time that historians and archaeologists of Egypt the Near East Greece and Rome have come together with sociologists political scientists and economists to ask whether the differences between accounts of these regions reflect real economic differences in the past or are merely a function of variations in the surviving evidence and the intellectual traditions that have grown up around it The contributors describe the types of evidence available and demonstrate the need for clearer thought about the relationships between evidence and models in ancient economic history laying the foundations for a new comparative account of economic structures and growth in the ancient Mediterranean world

The Tenants in the Vineyard John S. Kloppenborg, 2006 John S Kloppenborg gives a detailed analysis of one of the most difficult of Jesus parables the parable of the Tenants Mark 12 1-12 Gospel of Thomas 65 He examines the ways in which Christians have typically read and misread the parable and places the parable firmly in the context of the practices of ancient viticulture The author models a new approach to the

interpretation of the parables of Jesus First he critically engages the history of interpretation of the text inquiring into the ideological interests that the parable has engaged during the history of its use in Christian churches and in political discourse Second he reconstructs the social world in which the parable was first told in particular the economic social and legal aspects of ancient viticulture He demonstrates that the parable of the Tenants has mostly been interpreted from the standpoint of those who wield social and political power a strange irony considering the social status of the Jesus of history and the literary uses of the parable All of the features common to the parable as it is told by Mark and the Gospel of Thomas make it a perfectly realistic story It is only Mark s editing of the story that takes it beyond the realistic idiom characteristic of Jesus other parables The book concludes with a dossier of 58 papyrus documents relating to various aspects of viticulture and agrarian conflict It was awarded the 2007 Francis W Beare Book Award by the Canadian Society of Biblical Studies

Symbolic Blackness and Ethnic Difference in Early Christian Literature Gay L Byron,2003-10-04 There has been growing interest in recent years in the presence and image of blacks and blackness in classical antiquity However this pioneering and much needed work is the first to survey and theorise the black as seen by early Christian writers Lettered Christians Lincoln Blumell,2012-03-02 With the discovery of the Oxyrhynchus Papyri just over a century ago a number of important texts directly relating to ancient Christianity have come to light While certain literary texts have received considerable attention in scholarship by comparison the documentary evidence relating to Christianity has received far less attention and remains rather obscure To help redress this imbalance and to lend some context to the Christian literary materials this book examines the extant Christian epistolary remains from Oxyrhynchus between the third and seventh centuries CE Drawing upon this unique corpus of evidence which until this point has never been collectively nor systematically treated this book breaks new ground as it employs the letters to consider various questions relating to Christianity in the Oxyrhynchite Not only does this lucid study fill a void in scholarship it also gives a number of insights that have larger implications on Christianity in late antiquity

Class and Power in Roman Palestine Anthony Keddie,2019-10-03 Examines how socioeconomic relations between Judaeans elites and non elites changed as Palestine became part of the Roman Empire Roman Egypt Livia Capponi,2011-01-27 Egypt is by far the best documented province of the Roman Empire The dryness of its climate means that an enormous number of literary and documentary papyri have survived a unique reliable and lively source that documents Egypt in more detail than any other Roman province Hitherto these have not been used extensively by Roman historians on the erroneous assumption that Egypt is somehow atypical as a Roman province However scholars now agree that Egypt should be devoted more attention by anyone interested in the history of the Roman Empire This book offers a first approach to the subject presenting a survey of the most important aspects of life in the province under Roman domination from the conquest by Octavian in 30 BC to the third century AD as they emerge from the micro level of the Egyptian papyri and inscriptions but also from the ancient literary sources such as

Strabo Diodorus and Philo and from the most important archaeological discoveries The Economy of Roman Religion
Andrew Wilson, Nick Ray, Angela Trentacoste, 2023 This interdisciplinary edited volume presents twelve papers by Roman historians and archaeologists discussing the interconnected relationship between religion and the Roman economy over the period c 500 BC to AD 350 The connection between Roman religion and the economy has largely been ignored in work on the Roman economy but this volume explores the many complex ways in which economic and religious thinking and activities were interwoven from individuals to institutions The broad geographic and chronological scope of the volume engages with a notable variety of evidence epigraphic archaeological historical papyrological and zooarchaeological In addition to providing case studies that draw from the rich archaeological documentary and epigraphic evidence the volume also explores the different and sometimes divergent pictures offered by these sources from discrepancies in the cost of religious buildings to the tensions between piety and ostentatious donation The edited collection thus bridges economic social and religious themes The volume provides a view of a society in which religion had a central role in economic activity on an institutional to individual scale The volume allows an evaluation of impact of that activity from both financial and social viewpoints providing a new perspective on Roman religion a perspective to which a wide range of archaeological and documentary evidence from animal bone to coins and building costs has contributed As a result this volume not only provides new information on the economy of Roman religion it also proposes new ways of looking at existing bodies of evidence
