Common Corporate Tax Base (CC(C)TB) and Determination of Taxable Income Christoph Spengel, York Zöllkau, 2012-03-13 The study conducted by the Centre of European Economic Research ZEW the University of Mannheim and Ernst Young contributes to the ongoing evaluation of the proposal for a Draft Council Directive on a Common Consolidated Corporate Tax Base CC C TB released by the European Commission on March 16 2011 For the first time details on the determination of taxable income under the proposed Council Directive are compared to prevailing corporate tax accounting regulations in all 27 Member States Switzerland and the US The study presents evidence on the scope of differences and similarities between national tax accounting regulations and the Directive s treatment in a complete yet concise form Based on this comprehensive comparison it goes on to discuss remaining open questions and adjustments needed if the Directive is to be implemented in national tax law Readers seeking a basis for taking an active part in the public debate will find a valuable source of information and a first impression of how the proposed CC C TB would affect corporate tax burdens in the European Union

Economic Inequality and Poverty Nanak Kakwani, Hyun H. Son, 2022-08-11 Issues of economic inequality and poverty have become increasingly central to public debate over the past fifty years The literature on measuring economic inequality and poverty has vastly expanded developing many new methods but also generating many controversies Economic Inequality and Poverty provides a systematic treatment of the development of inequality and poverty focusing on how income inequality and poverty measurements have evolved in recent decades and identifying approaches to resolving some of the methodological and factual conflicts The books primary aim is to analyse the relationships between individuals and households distributions of economic variables These relationships are crucial in understanding many

economic phenomena Kakwani and Son employ household surveys to illustrate the application of their framework demonstrating its importance in drawing evidence based policy conclusions *Staff Studies for the World Economic Outlook, December 1993* International Monetary Fund, 1994-01-15 This paper focuses on the private nonfinancial sectors of the affected economies financial liberalization provided households and businesses with greater access to credit markets This contributed to the long period of expansion during the 1980s Partly as a result of major changes to the financial systems several industrial countries had a boom in asset markets associated with a period of asset accumulation an unprecedented buildup of debt a sharp increase in relative asset prices and related increases in household wealth The expansion in household financial activity in the United Kingdom during the 1980s was paralleled by a sizable boom in investment spending and an increase in corporate debt The structure of balance sheets was also affected by mergers and acquisitions that led to a further expansion in corporate debt New types of bank loans and accounts have prevented even greater disintermediation but have also reduced net interest margins because more deposits now earn market related rates of return **Canada-U.S. Tax Comparisons** John B. Shoven, John Whalley, 2007-12-01 In the increasingly global economy domestic tax policies have taken on a new importance for international economics This unique volume compares the tax reform experiences of Canada and the United States two countries with the world s largest bilateral flow of trade and investment With the signing of the U S Canada Free Trade Agreement and the tax reforms of the 1980s there has been some harmonization of tax systems But geographic cultural and political characteristics shape distinct national social policies that may impede harmonization As the U S and Canadian economies become even more integrated differences in tax systems will have important effects in particular on the relative rates of economic growth In this timely study scholars from both countries show that while the United States and Canada exhibit similar corporate tax structures and income tax systems they have very different approaches to sales tax and social security taxes Despite these differences the two countries generate roughly the same amounts of revenue produce similar costs of capital and produce comparable distributions of income
