Innovations in Tax Compliance Roel Dom, Anna Custers, Stephen Davenport, Wilson Prichard, 2022-03-14 Recent decades have seen important progress in strengthening country tax systems Yet many areas of

The Economic Psychology of Tax Behaviour Erich Kirchler,2007-06-21 Tax evasion is a complex phenomenon which is influenced not just by economic motives but by psychological factors as well Economic psychological research focuses on individual and social representations of taxation as well as decision making In this 2007 book Erich Kirchler assembles research on tax compliance with a focus on tax evasion and integrates the findings into a model based on the interaction climate between tax authorities and taxpayers The interaction climate is defined by citizens trust in authorities and the power of authorities to control taxpayers effectively depending on trust and power either

voluntary compliance enforced compliance or no compliance are likely outcomes Featuring chapters on the social representations of taxation decision making and self employed income tax behaviour this book will appeal to researchers in economic psychology behavioural economics and public administration **International Development** Bruce Currie-Alder,Ravi Kanbur,David M. Malone,Rohinton Medhora,2014 A central premise is that an objective and universally accepted measure of success in development and paths to it does not exist **Public Economics** M Govinda Rao,Mihir Rakshit,2011-01-06 Amaresh Bagchi Indian economist contributed articles **Taxation and Development** Mr.Michael Keen,2012-09-01 Issues of taxation and development which have long been a central concern of the IMF have attracted wider and renewed interest in the last few years This paper reflects on three broad lessons of experience that developing countries differ vastly in tax matters and in ways that are less than fully understood that the history of big ideas in guiding tax reform for developing countries is decidedly mixed and that the value of the emphasis often placed in this context on informality is decidedly limited It also asks whether ideas of state building emphasized in some of the recent literature are likely to lead to practical advice much different from that commonly offered now *OECD Tax Policy Reviews: Lithuania 2022* OECD,2022-12-15 This report provides a comprehensive assessment of Lithuania s tax and benefit system and recommendations for tax reform It outlines the country s key economic and tax challenges and assesses the effects of taxation on employment A special focus is given to the taxation of self employed individuals *The Institutions Curse* Victor Menaldo,2016-08-16 The resource curse is the view that countries with extensive natural resources tend to suffer from a host of undesirable outcomes including the weakening of state capacity authoritarianism fewer public goods war and economic stagnation This book debunks this view arguing that there is an institutions curse rather than a resource curse Legacies endemic to the developing world have impelled many countries to develop natural resources as a default sector in lieu of cultivating modern and diversified economies and bad institutions have also condemned nations to suffer from ills unduly attributed to minerals and oil Victor Menaldo also argues that natural resources can actually play an integral role in stimulating state capacity capitalism industrialization and democracy even if resources are themselves often a symptom of underdevelopment Despite being cursed by their institutions weak states are blessed by their resources greater oil means more development both historically and across countries today
