role in forming the distinctive Japanese American identity **The Ideologies of Japanese Tea** Tim Cross,2009-09-01 This provoking new study of the Japanese tea ceremony chanoyu examines the ideological foundation of its place in history and the broader context of Japanese cultural values where it has emerged as a so called quintessential component of the culture It was in fact Sen Soshitsu XI grandmaster of Urasenke today the most globally prominent tea school who argued in 1872 that tea should be viewed as the expression of the moral universe of the nation A practising teamaster himself the author argues however that tea was many other things it was privilege politics power and the lever for passion and commitment in the theatre of war Through a methodological framework rooted in current approaches he demonstrates how the iconic images as supposedly timeless examples of Japanese tradition have been the subject of manipulation as ideological tools and speaks to presentations of cultural identity in Japanese society today Japanese Gardens Günter Nitschke,1999 **Wind in the Pines** Dennis Hirota,1995 Wind in the Pines is a collection of writings that seek to illuminate the nature and aesthetics of chanoyu as a Buddhist path Beginning with works on the art of linked verse renga that directly influenced the development of the way of tea this book includes documents that are associated with the central figures in the formation of chanoyu in the spirit of wabi the venerable poverty of the hermit s thatched hut and that have been treasured by practitioners down to the present **Smart Science, Design & Technology** Artde Lam,Stephen Prior,Siu-Tsen Shen,Sheng-Joue Young,Liang-Wen Ji,2019-11-01 Smart Science Design Technology represents the proceedings of the 5th International Conference on Applied System Innovation ICASI 2019 which was held in Fukuoka Japan April 12 18 2019 The conference received more than 300 submitted papers from at least 20 different countries whereby one third of these papers was selected by the committees and invited to present at ICASI 2019 The resulting book aims to provide an integrated communication platform for researchers active in a wide range of fields including information technology communication science applied mathematics computer science advanced material science and engineering Major breakthroughs are being made by interdisciplinary collaborations between science and engineering technologists in academia and industry within this unique international network Smart Science has emerged as a separate discipline involving innovative practices methodologies and processes *Chanoyu Quarterly* ,1999 A journal devoted to the Japanese tea ceremony and the arts of Japan **Waterstone's Guide to Books** Waterstone & Co,1989 **Experiencing the World's Religions** Michael Molloy,2008 Provides an account of religion as a diverse lived experience by peoples around the world This book conveys the vitality and richness of the world s religions as a living cultural wellspring that concerns systems of belief and how those beliefs are expressed in ceremonies food clothing art architecture pilgrimage scripture and music The Zen Arts Rupert Cox,2013-11-05 The tea ceremony and the martial arts are intimately linked in the popular and historical imagination with Zen Buddhism and Japanese culture They are commonly interpreted as religio aesthetic pursuits which express core spiritual values through bodily gesture and the creation of highly valued objects Ideally the experience of practising the Zen arts

culminates in enlightenment This book challenges that long held view and proposes that the Zen arts should be understood as part of a literary and visual history of representing Japanese culture through the arts Cox argues that these texts and images emerged fully as systems for representing the arts during the modern period produced within Japan as a form of cultural nationalism and outside Japan as part of an orientalist discourse Practitioners experiences are in fact rarely referred to in terms of Zen or art but instead are spatially and socially grounded Combining anthropological description with historical criticism Cox shows that the Zen arts are best understood in terms of a dynamic relationship between an aesthetic discourse on art and culture and the social and embodied experiences of those who participate in them
