Barton,2019-12-17 An urgent plea for much needed reforms to legal education The period from 2008 to 2018 was a lost decade for American law schools Employment results were terrible Applications and enrollment cratered Revenue dropped precipitously and several law schools closed Almost all law schools shrank in terms of students faculty and staff A handful of schools even closed Despite these dismal results law school tuition outran inflation and student indebtedness exploded creating a truly toxic brew of higher costs for worse results The election of Donald Trump in 2016 and the subsequent role of hero lawyers in the resistance has made law school relevant again and applications have increased However despite the strong early returns we still have no idea whether law schools are out of the woods or not If the Trump Bump is temporary or does not result in steady enrollment increases more schools will close But if it does last we face another danger We tend to hope that crises bring about a process of creative destruction where a downturn causes some businesses to fail and other businesses to adapt And some of the reforms needed at law schools are obvious tuition fees need to come down teaching practices need to change there should be greater regulations on law schools that fail to deliver on employment and bar passage Ironically the opposite has happened for law schools they suffered a harrowing near death experience and the survivors look like they are going to exhale gratefully and then go back to doing exactly what led them into the crisis in the first place The urgency of this book is to convince law school stakeholders faculty students applicants graduates and regulators not to just return to business as usual if the Trump Bump proves to be permanent We have come too far through too much to just shrug our shoulders and move on Law Librarianship Practice Ellyssa Kroski,2025-07-10 This ground breaking new legal librarianship book serves as an invaluable resource for practicing law librarians who want to be at the forefront of information technology and law libraries Law librarianship is a constantly evolving field that has seen major shifts in practice over the past several years including the post pandemic trend towards remote and hybrid work the increased prominence of virtual services the outsourcing of library staff burgeoning cybersecurity risks and the advent of generative AI Law librarians have adroitly adapted to all of these changes and have once again proven their resilience Law Librarianship Practice is a cutting edge book that provides insights into the latest emerging trends and technologies in academic government and law firm librarianship This book offers guidance from forward thinking library leaders on how they are tackling the challenges of law librarianship today including managing remote workforces negotiating with vendors navigating outsourcing services planning for emergencies riding out law firm mergers succession planning and more Experts working in the field provide practical applications of new technologies and opportunities such as how librarians are conducting AI informed competitive

intelligence using big data for decision making and what s happening in artificial intelligence The book also covers innovative initiatives in the areas of diversity equity and inclusion Access to Justice and more Law Librarianship Practice serves as a comprehensive manual of modern day law library practices providing invaluable resources for law librarians Readers will gain inspiration from nearly thirty chapters contributed by distinguished academic government and law firm librarians as well as library consultants who share their experience along with a combination of researched data contract excerpts surveys and other real world intelligence Divided into three segments readers will be led through twenty eight chapters in the areas of Law Library Management Law Library Technologies and Law Library Challenges and Opportunities **Member's Guide**
