Teacher Development and the Struggle for Authenticity Peter Philip Grimmert,Jonathan Neufeld,1994

Authentic Assessment in Action Linda Darling-Hammond,Beverly F. Falk,Jacqueline Ancess,2017-10-05 This book examines through case studies of elementary and secondary schools how five schools have developed authentic performance based assessments of students learning and how this work has interacted with and influenced the teaching and learning experiences students encounter in school This important and timely book reveals the changing dynamics of classroom life as it moves from more traditional pedagogy to one that asks students to master intellectual and practical skills that are eminently transferable to real life social settings and workplaces The issue of assessment comes first but we see in the following case studies how it becomes powerfully enveloped in the processes of learning and teaching of informing students teachers parents and others of how the children are doing The portraits explicitly and implicitly suggest a deep fair and defensible way to answer the question How m I doing in a manner that helps this child and eventually every child From the Foreword by Theodore R Sizer Informative and thought provoking American Journal of Education *Changing Times In Teacher Education* Marvin F. Wideen,Peter P. Grimmert,2013-05-13 Pressures for reform in teacher education have begun to take on the same sense of urgency as school reform Those faculties of education who have been strong advocates for change in the schools now find themselves the subject of similar pressures from governmental policy makers Attempts at change have taken place in many different countries and jurisdictions around the world This book details through a series of international vignettes how teachers are responding to the changing times and social contexts in which they do their work The authors hold the view that changes are inevitable in teacher education but what is not clear is who will control the changes and whether the end result will actually improve the preparation of teachers The theme of the book is that the reform of teacher education should be informed by intelligent debate and that any attempt to restructure teacher preparation should result from a careful reconceptualisation of it purposes and processes *Progress in Educations* R. Nata,2004 This series presents substantial results from around the globe in selected areas of educational research The field of education is consistently on the top of priority lists of every country in the world yet few educators are aware of the progress elsewhere Many techniques programs and methods are directly applicable across borders This series attempts to shed light on successes wherever they may occur in the hope that many wheels need not be reinvented again and again *Authenticity in and through Teaching in Higher Education* Carolin Kreber,2013-02-11 What does it mean to be authentic Why should it matter whether or not we become more authentic How might authenticity inform and enhance the social practice of the scholarship of university teaching and by implication the learning and development of students Authenticity in and through Teaching introduces three distinct perspectives on authenticity the existential the critical and the communitarian and shows what moving towards greater authenticity involves for teachers and students when viewed from each of these angles In

developing the notion of the scholarship of teaching as an authentic practice this book draws on several complementary ideas from social philosophy to explore the nature of this practice and the conditions under which it might qualify as authentic Other concepts guiding the analysis include virtue being communicative action power critical reflection and transformation Authenticity in and through Teaching also introduces a vision of the scholarship of teaching whose ultimate aim it is to serve the important interests of students These important interests it is argued are the students own striving and development towards greater authenticity Both teachers and students are thus implicated in a process of transformative learning including objective and subjective reframing redefinition and reconstruction through critical reflection and critical self reflection on assumptions It is argued that in important ways this transformative process is intimately bound up with becoming more authentic Rather than being concerned principally with rendering research evidence of what works the scholarship of teaching emerges as a social practice that is equally concerned with the questions surrounding the value desirability and emancipatory potential of what we do in teaching The scholarship of teaching therefore also engages with the bigger questions of social justice and equality in and through higher education The book combines Carolin Kreber s previous research on authenticity with earlier work on the scholarship of teaching offering a provocative fresh and timely perspective on the scholarship of university teaching and professional learning

Educating for Civic-mindedness Carolin Kreber, 2016-06-17 Imagined at their best how might professions contribute most effectively to their local and global communities and how could higher education support graduates future professionals in making this contribution The answer proposed in this book is to educate students for civic mindedness an overarching professional capability grounded in certain dispositions and qualities ideals types of knowledge and political emotions Civic mindedness and its internal counterpart the practitioner s self cultivation give rise to an engagement with professional practice that is authentic civic and democratic The tension between responsiveness or regard for others and regard for self is overcome by recognising that authentic professional identities are constructed through practices around

shared purposes and ideals Drawing on a wide range of theorists including Dewey Arendt and Nussbaum professions are envisaged to play a vital role Primarily professions support society s well being by ensuring access to public goods such as local and global justice access to information health education safety housing the beauty and sustaining power of the ecological environment among others Yet professions also protect the fundamental good of citizen participation in free deliberation and decision making on issues affecting their lives The book concludes with a vision of higher education that is transformative of graduates professionals pedagogies professional practices and communities Issues of increasing social awareness are a key concern for anyone involved in teaching professionals and this book which builds best practice around a sound theoretical and philosophical framework will prove both thought provoking and practical in application **A**

Realities of Teachers' Work Sandra Acker, 1999-04-01 The Realities of Teacher Work Never a Dull Moment follows the fortunes of the teachers at Hillview Primary School over ten years It explores what it is like to be a primary or elementary school teacher in an urban school with about 200 children mixed in social class and ethnicity and suggests what we may learn from them for the future Sandra Acker links her research

with other literature on teachers work and describes the school as a workplace focusing on four key features the characteristics of the children the school's physical setting the available resources and the ethos of the school She successfully places us in the classroom giving vivid images of daily interactions with the children and shows too how teaching extends far beyond the classroom door The book explores the caring culture that has developed among the teachers and helps them to cope with the difficulties they encounter It also considers the school as located in the wider community by looking at changes in teachers careers over time and the effects on Hillview of recent educational reform This book shows us how and why we need to revise our assumptions about schools and teachers and see them not as isolated individuals in closed classrooms and self contained schools but as an integral part of a much broader community Above all it shows that teaching is hard demanding work that is influenced by workplace cultures and the gendered expectations society holds about teachers

The Gender Politics Of Educational Change Amanda Datnow,2002-11-01 What is the relationship of gender to the micropolitics of school reform This book explores this timely research question revealing the everyday struggles that happen between different factions of teachers with different definitions of what school means for students The focus of this struggle however may not be on education but rather on such underlying issues as gender Using case studies the author shows how gender politics can be used by teachers to delay reform

EBOOK: ENGAGING TEACHERS Trevor Gale,Kathleen Densmore,2003-04-16 This is a useful interesting and valuable work The authors ask the difficult questions and attempt answers which although complex are written in an accessible and open manner It deserves to be widely read Educational Review Engaging Teachers makes a deliberate attempt to reclaim the education discourse captured by new right politics and connect it with a radical democratic agenda for schooling On its agenda are education markets policy leadership professionalism and communities Engaging with these is conceived on at least two levels First as an invitation to teachers to become involved in reconstructing schooling for socially just purposes and in democratic ways From this perspective the politics of engagement is not simply a matter of acquiescence or resistance but is informed by a commitment to generate alternatives teachers parents and students making things happen rather than having things done to them Also signalled is an intent to work collectively exploring and acting on common interests and across uncommon ground Second the book also celebrates teachers engaging in these reconstructive efforts in attractive and meaningful ways The attraction is decisions about schooling made by those they affect as well as decisions that are meaningful because they engage the interests of all

Researching School Experience Martyn Hammersley,1999-09-09 There is a tendency in much educational thinking to view pupils in passive terms as the material on which schools operate This damaging view is challenged here Significant recent research shows the effects of changing educational conditions on the experience of

teaching and learning in schools By redressing the balance and acknowledging the affective side of pupils and their learning this book shows that improved understanding leads to improved teaching Contributions from Stephen Ball Martyn Descombe Ann Filer Andy Hargreaves Bob Jeffrey Geoff Troman Andrew Pollard and Peter Woods Teacher Professional Development in Changing Conditions Douwe Beijaard,Pauline C. Meijer,Greta Morine-Dersheimer,Tillema Harm,2005-12-12 This book presents some highlights from the deliberations of the 2003 conference of the International Study Association on Teachers and Teaching ISATT Part 1 presents the five keynote addresses of the conference while Parts 2 through 4 present selected papers related to each of three sub themes knowledge construction and learning to teach perspectives on teachers personal and professional lives and teachers workplace as context for learning The chapters in this book provide an array of approaches to understanding the process of teacher learning within the current context of the changing workplace environment They also provide an important international perspective on the complex issues revolving around the international educational reform movement Basically they show how teachers workplace inside and outside schools are more than ever subject to continuous change and that subsequently standards for teaching must be flexible to these changing conditions This asks for a redefinition of teacher professionalism in which the role of context in teacher learning is emphasized as well as the improvement of the quality of teacher thinking and learning Related to the ever changing context of teaching a dynamic approach to teaching and teacher learning is required in which identity development is crucial Researchers have an important role to play in revealing and explaining how teachers can build their professional identity through self awareness and reflection in the ever changing educational contexts throughout the world *Teacher Thinking, Beliefs and Knowledge in Higher Education* N. Hativa,Jeffrey Goodyear,2012-12-06 This volume addresses the important problem of understanding good university teaching and focuses on the thinking beliefs and knowledge which accompany teachers actions It is the first book to address this area and it promises to become a landmark volume in the field helping us to understand a complex area of human activity and improve both teaching and learning It is for education researchers staff faculty developers and educational developers
