Teacher To Tycoon:

Teacher to Tycoon Erlinda Enriquez Panlilio, 2000 *From Teacher to Tycoon* Robert Codner, 1992 *Let Them Eat Data* C. A. Bowers, 2000 Do computers foster cultural diversity Ecological sustainability In our age of high tech euphoria we seem content to leave tough questions like these to the experts That dangerous inclination is at the heart of this important examination of the commercial and educational trends that have left us so uncritically optimistic about global computing Contrary to the attitudes that have been marketed and taught to us says C A Bowers the fact is that computers operate on a set of Western cultural assumptions and a market economy that drives consumption Our indoctrination includes the view of global computing innovations as inevitable and on a par with social progress a perspective dismayingly suggestive of the mindset that engendered the vast cultural and ecological disruptions of the industrial revolution and world colonialism In *Let Them Eat Data* Bowers discusses important issues that have fallen into the gap between our perceptions and the realities of global computing including the misuse of the theory of evolution to justify and legitimate the global spread of computers and the ecological and cultural implications of unmooring knowledge from its local contexts as it is digitized commodified and packaged for global consumption He also suggests ways that educators can help us think more critically about technology *Let Them Eat Data* is essential reading if we are to begin democratizing technological decisions conserving true cultural diversity and intergenerational forms of knowledge and living within the limits and possibilities of the earth's natural systems
