The Fao Agricultural Production Index Fao Economic And Social Development Paper:

The FAO Agricultural Production Index Organisation des Nations Unies pour l'alimentation et l'agriculture. Division de la statistique, 1986 The FAO Agricultural Production Index Food and Agriculture Organization of the United Nations. Statistics Division, 1986 With correction slip *International Comparisons of Prices, Output and Productivity* J. Salazar-Carrillo, D.S. Prasada Rao, 2012-12-02 The present volume provides a timely collection of material on the subject of international comparisons contributed by leading scholars from an extensive range of relevant disciplines and geographical backgrounds The papers in this volume have been classified into two broad groups united by overlapping themes Part I includes essentially empirical papers intended to provide a clear picture of the different types of international comparisons that have been undertaken by various organizations and individuals The papers relate to empirical studies of different sectoral and national income aggregates at both regional and global levels The papers in Part II deal with methodological and analytical issues Discussion of the appropriateness of various aggregation methods for international comparisons accounts for a major component of this section The volume provides a set of stimulating studies on international comparisons of prices output and productivity and will provide a useful reference source for many interested readers around the world **The State of Food and Agriculture 2007** Food and Agriculture Organization of the United Nations, 2007-01-01 International food aid has rightly been credited with saving millions of lives and is often the only thing that stands between vulnerable people and death However it was a serious obstacle in the Doha Round of multilateral trade negotiations and has been sharply criticised as a donor driven response that creates dependency on the part of recipients and undermines local agricultural producers and traders upon whom sustainable food security depends This issue of the State of Food and Agriculture report examines the issues and controversies surrounding international food aid particularly in crisis situations It considers the ways in which food aid can support sustainable improvements in food security in order to preserve its essential humanitarian role whilst minimising the possibility of harmful secondary impacts Journal of the Indian Society of Agricultural Statistics Indian Society of Agricultural Statistics, 1998 *Index Numbers* D.S. Prasada Rao, E.A. Selvanathan, 2016-07-27 An authoritative survey with exciting new insights of special interest to economists and econometricians who analyse intertemporal and interspatial price relationships Professor Angus Maddison Groningen University This book presents a comprehensive review of recent developments in the theory and construction of index numbers using the stochastic approach demonstrating the versatility of this approach in handling various index number problems within a single conceptual framework It also contains a brief but complete review of the existing approaches to index numbers with illustrative numerical examples The stochastic approach considers the index number problem as a signal extraction problem The strength and reliability of the signal extracted from price and quantity changes for different commodities depends upon the messages received and the information content of the messages The most important

applications of the new approach are to be found in the context of measuring rate of inflation fixed and chain base index numbers for temporal comparisons and for spatial intercountry comparisons the latter generally require special index number formulae that result in transitive and base invariant comparisons
