Crime against Women Prof. Sarita Vashistha, 2021-09-15 Ironically women are still victimised in our society They have been at the receiving end from the very beginning of our civilization and culture Cutting across the regional and political barriers their lot has been the same The wrong perception prevalent in our society is that they are born to be subservient to men and they must be confined to child bearing and rearing only There has been a growing trend of violence against women more so with hunger and greed for material things Progressive changes in personal lifestyle living standards and varied growth caused by urbanisation and changes in social ethos all contribute to violent attitudes and tendencies

towards women which have resulted in an increase in crimes against women This book would prove to be of worth for all scholars researchers and social workers who may prefer to know about the subject They would find it easy to read and comprehend It would certainly be an asset for them **Representing Culture** Claudia Alvares,2009-03-26 The essays collected in this volume are interdisciplinary in nature defying the traditional boundaries that compartmentalise and contain knowledge within particular camps Heir to the undisciplining legacy of cultural studies they attempt to transcend the restrictive frameworks of pre established discourse engaging in new and fruitful combinations of theories and methodologies The general aim of the book is to indicate new perspectives for the exercise of cultural criticism on the basis of the major issues that confront us today rather than articulate any canonical viewpoint on traditional cultural studies These essays thus share a common denominator in that they seek to explore the field of current experience through the exercise of critique The recontextualisation of cultural studies that this book attempts occurs along the vectors of identity politics visual culture and technology The collection draws attention to the fact that these vectors do not consist in delimited camps but rather in axes that intersect with each other at each instance

cultural industries is of particular relevance at a time when the market is strictly regulated by a few multinational corporations She contends that marginality should not be construed exclusively as a basis for understanding Rushdie s work since a critical grounding in marginality will predictably involve a reproduction of the traditional postcolonial binaries of oppressor oppressed and colonizer colonized that the writer subverts Rather she seeks to expand existing interpretations of Rushdie s work itineraries and frameworks in order to take into account the actual conditions of postcolonial cultural production and circulation within a marketplace that is global in both orientation and effects
