**The Farm and the City** American Assembly Staff, *Of Cabbages and Kings County* Marc Linder, Lawrence S. Zacharias, 1999 In particular they question whether sprawl was a necessary condition of American industrialization could the agricultural base that preceded and surrounded the city have survived the onrush of residential real estate speculation with a bit of foresight and public policies that the politically outnumbered farmers could not have secured on their own Holding Our Ground Deborah Bowers, Tom Daniels, 1997-03-01 Farmers who own or rent most of the private land in America hold the key not only to the nation's food supply but also to managing community growth maintaining an attractive landscape and protecting water and wildlife resources While the issue of protecting farmland and open space is not new the intensity of the challenge has increased Farmers are harder pressed to make a living and rural and suburban communities are struggling to accommodate increasing populations and the development that comes with them Holding Our Ground can help landowners and communities devise and implement effective strategies for protecting farmland The book discusses the reasons for protecting farmland and how to make those reasons widely known and understood describes the business of farming federal government farm programs and the role of land in farmers's decisions analyzes federal state and local farmland protection efforts and techniques explores a variety of land protection options including purchase of development rights transfer of development rights private land trusts and financial tax and estate planning reviews the strengths and weaknesses of the farmland protection tools available The authors describe the many challenges involved in protecting farmland and explain how to create a package of techniques that can meet those challenges In addition they offer appendixes with model zoning ordinances nuisance disclaimers conservation easements and other documents that individuals and communities need to carry out the programs discussed Holding Our Ground provides citizens elected officials planners and landowners with a solid basis for understanding the issues behind farmland protection and will be an invaluable resource in developing techniques and programs for achieving long term protection goals **Transnational Crime Fiction** Maarit

Piipponen, Helen Mäntymäki, Marinella Rodi-Risberg, 2020-10-27 Focusing on contemporary crime narratives from different parts of the world this collection of essays explores the mobility of crimes criminals and investigators across social cultural and national borders The essays argue that such border crossings reflect on recent sociocultural transformations and geopolitical anxieties to create an image of networked and interconnected societies where crime is not easily contained The book further analyses crime texts wider sociocultural and affective significance by examining the global mobility of the genre itself across cultures languages and media Underlining the global reach and mobility of the crime genre the collection analyses types and representations of mobility in literary and visual crime narratives inviting comparisons between texts crimes and mobilities in a geographically diverse context The collection ultimately understands mobility as an object of study and a critical lens through which transformations in our globalised world can be examined **Cities After Socialism**

Gregory Andrusz, Michael Harloe, Ivan Szelenyi, 2011-08-10 *Cities After Socialism* is the first substantial and authoritative analysis of the role of cities in the transition to capitalism that is occurring in the former communist states of Eastern Europe and the Soviet Union. It will be of equal value to urban specialists and to those who have a more general interest in the most dramatic socio-political event of the contemporary era: the collapse of state socialism. Written by an international group of leading experts in the field, *Cities after socialism* asks and answers some crucial questions about the nature of the emergent post-socialist urban system and the conflicts and inequalities which are being generated by the processes of change now occurring.

*A Social Geography of Canada* Guy M. Robinson, 2013-12-30 This collection of essays focuses on subjects which formed the basis of his life's work: the changing character of Canadian landscape and society and the urbanization of that society including aspects of its historical evolution, its present spatial forms and current social issues.

**The Importance of Place in Contemporary Italian Crime Fiction** Barbara Pezzotti, 2012-09-20 By taking as its point of departure the privileged relationship between the crime novel and its setting, this book is the most wide-ranging examination of the way in which Italian detective fiction in the last twenty years has become a means to articulate the changes in the social landscape of the country. Nowadays there is a general acknowledgment of the importance of place in Italian crime novels. However, apart from a limited scholarship on single cities, the genre has never been systematically studied in a way that so comprehensively spans Italian national boundaries. The originality of this volume also lies in the fact that the author has not limited her investigation to a series of cities but rather she has considered the different forms of social landscape in which Italian crime novels are set. Through the analysis of the way in which cities, the urban sprawl and islands are represented in the serial novels of eleven of the most important contemporary crime writers in Italy of the 1990s, Pezzotti articulates the different ways in which individual authors appropriate the structures and tropes of the genre to reflect the social transformations and dysfunctions of contemporary Italy. In so doing, this volume also makes a case for the genre as an instrument of social critique and analysis of a still elusive Italian national identity, thus bringing further evidence in support of the thesis that in Italy detective fiction has come to play the role of the new social novel.

**Demands On Rural Lands** Chris Cocklin, 2019-04-09 Planning for the use of rural lands in the developed countries of the world has become an increasingly contentious process as resources become more limited and conflicting needs grow stronger. The critical questions are: Which is more important: agriculture, livestock production, recreation, industry, or urban housing? and Who decides priorities and responsibilities for use? The capacity of the land to meet all of the demands placed upon it without serious environmental disruption has become a major concern for all. Recognizing the exigencies of the situation, the contributors define and

evaluate the theoretical and methodological frameworks within which rural land use problems can be analyzed In the discussions focus on the identification and characterization of resources and competing users of rural lands stressing that a careful articulation of the problem is essential to effective planning is aimed at developing appropriate information bases useful in planning for the problems related to the management of these rural lands The discussion of policy options for rural resource use in builds upon the material in the previous two sections to provide a framework for an analysis of rural resource use

*Remaking American Communities*

David C. Soule, 2007-11-01 Urban sprawl has gained much national attention in recent years. Sprawl involves not only land use issues but also legal, political, and social concerns. It affects our schools, the environment, and race relations. Comprehensive enough for high school students and also appropriate for college undergraduates, *Remaking American Communities* delves into the challenges of urban sprawl by turning to some of America's top thinkers on the problem, including Robert Yaro, president of the Regional Planning Association. Other cutting-edge essays include a foreword about the emergence of sprawl by nationally syndicated columnist Neal Peirce, views about race and class by former mayor of Albuquerque David Rusk, and a discussion of transportation dynamics by Curtis Johnson, president of the CitiStates Group. The essays in this collection explore the core issues of sprawl and the agenda for dealing with it. Complete with a glossary, resources, and contact information for smart growth alliances, this book is extremely user-friendly. David C. Soule offers an unbiased viewpoint of this national phenomenon in a way that will be accessible to students and those with little background in the issue.
