The Fifth Tiger A Study Of Thai Development Policy:

The Fifth Tiger Robert J. Muscat,1994 **The Fifth Tiger** Robert J. Muscat,2016-09-16 Thailand's dynamic economic development has earned it a reputation as the Fifth Tiger following on the heels of the superperforming Four Tigers South Korea Taiwan Singapore and Hong Kong This is a study of Thailand's development experience since 1955 **Asia-Africa Development Divergence** David Henley,2015-02-12 Why have South East Asian countries like Malaysia Indonesia and Vietnam been so successful in reducing levels of absolute poverty while in African countries like Kenya Nigeria and Tanzania despite recent economic growth most people are still almost as poor as they were half a century ago This book presents a simple radical explanation for the great divergence in development performance between Asia and Africa the absence in most parts of Africa and the presence in Asia of serious developmental intent on the part of national political leaders *The Oxford Handbook of Business Groups* Asli M. Colpan,Takashi Hikino,James R. Lincoln,2010-08-06 Business groups large diversified often family controlled organizations with pyramidal ownership structure such as the Japanese zaibatsu the Korean chaebol and the grupos economicos in Latin America have played a significant role in national economic growth especially in emerging economies Earlier variants can also be found in the trading companies often set up in Britain which operated in Asia Africa and Latin America Business groups are often criticized as premodern forms of economic organization and occasionally as symptomatic of corrupt crony capitalism but many have shown remarkable resilience navigating and adjusting to economic and political turbulence international competition and technological change This Handbook provides a comprehensive analysis of business groups around the world It examines the adaptive and competitive capabilities of business groups and their evolutionary dynamics 16 individual country chapters deal with business groups from Asia to Africa the Middle East to Latin America while overarching chapters consider the historical and theoretical context of business groups With contributions from leading experts The Oxford Handbook of business groups provides a comprehensive empirically and theoretically rich guide for scholars and policy makers **Southeast Asian Paper Tigers** K. S. Jomo,2013-04-03 This important collection is a timely contribution to the debate on the Asian financial crisis With chapters written by well established international experts in Asian economics this book constitutes a finely judged example of the varying opinions on the matter *Drums of War, Drums of Development: The Formation of a Pacific Ruling Class and Industrial Transformation in East and Southeast Asia, 1945-1980* Jim Glassman,2018-08-13 In *Drums of War Drums of Development* Jim Glassman analyses the geopolitical economy of industrial development in East and Southeast Asia during the Vietnam War era showing how it was shaped by the collaborative planning of US and Asian elites Challenging both neo liberal and neo Weberian accounts of East Asian development Glassman offers evidence that the growth of industry the East Asian miracle was deeply affected by the geopolitics of war and military spending the East Asian massacres Thus while Asian industrial development has been presented as providing models for emulation Glassman cautions that this industrial

dynamism was a product of Pacific ruling class manoeuvring which left a contradictory legacy of rapid growth death and ongoing challenges for development and democracy Shortlisted for the 2019 Deutscher Memorial Prize *Southeast Asia* Jonathan Rigg,1997 Drawing on case studies from across Southeast Asia this work assesses poverty and the ways in which the poor are identified and viewed Progress and change in the rural and urban worlds are examined in detail focusing on the strengthening rural urban interaction as farmers make a living in the urban industrial sector and factories relocate into industrial areas Giving prominence to indigenous notions of development based on Buddhism Islam and the so called Asian Way the author critically assesses the conceptual foundations of the development ideas of post developmentalism and the miracle thesis

Bangkok Marc Askew,2004-08-02 Bangkok is one of Asia s most interesting varied controversial and challenging cities It is a city of contradictions both in its present and past This unique book examines the development of the city from its earliest days as the seat of the Thai monarchy to its current position as an infamous contemporary metropolis Adopting insights from anthropology urban studies and human geography this is a powerful account of the city and its dynamic spaces Marc Askew examines the city s variety from the inner city slums to the rural urban fringe and gives us a keen insight into the daily life of the city s inhabitants be they middle class suburbanites or sex workers *The Political Economy of Capital Market Reforms in Southeast Asia* X. Zhang,2011-09-13 In this book Xiaoke Zhang addresses two fundamental political and policy questions why do politicians have heterogeneous incentives to pursue public regarding policies through capital market reforms and why do they differ in their abilities to initiate and implement market reform policies decisively and resolutely *East Asian Transformation* Jeffrey Henderson,2011-02-25 From the re emergence of Japan as an industrial power in the 1950s through to the contemporary rise of China as a potential economic and political behemoth the story of East Asian development has been central to any serious analysis of the dynamics and trajectory of the global political economy Integrated into a coherent critical narrative this book examines key political economic and social dynamics that helped forge the miracle economies of East Asia and continue to drive them forward in the volatile circumstances of our current epoch It analyses the relation between the state and markets the changing nature of economic governance and its relation to inequality and the rise of China and its international consequences Historically informed and comparative in nature the book contributes to the analysis of the transformations of Japan Hong Kong South Korea Taiwan Singapore Malaysia and China and is the first to cover the ground in one volume Written by a leading analyst of East Asian development the book engages with the relevant issues and debates in an open non technical language making it useful as an advanced textbook not only for East Asian studies but more generally in international political economy and development studies

Systemic Vulnerability and Sustainable Economic Growth Bryan K. Ritchie,2010-01-01 For many developing countries economic growth is an elusive quest Both economists and policy makers have long known that issues such as education investment and infrastructure are necessary ingredients for development and yet only a very small number of

countries seem to be able to come up with the right mix of these ingredients Bryan Ritchie demonstrates how political relationships among government business academic and labor leaders create different incentives for economic actors to make key decisions to promote economic upgrading and sustainable development He reveals how these decisions affect matters such as bureaucratic structures the language of education a focus on technology and innovation and the inclusion of labor in business strategy These shape the institutional structures that in turn create the foundation of government policy The policies and the political relationships that form around them can be beneficial or detrimental to the economic development of the country This insightful study shows how the level of systemic vulnerability which is a combination of resource endowments domestic conflict and external military security determines which forms they take Systemic Vulnerability and Sustainable Economic Growth will be warmly welcomed by academics and researchers of political science economics development economics particularly and Asian studies Policy makers will find invaluable insights such as how government bodies can successfully incorporate actors from the private sector The book will also appeal to business leaders wishing to know why policy makers act the way they do

Industrial Transformation in the Developing World Michael T. Rock, David P. Angel, 2005-10-06 Grow first clean up later environmental strategies in the developing economies of East Asia China Korea and Taiwan in Northeast Asia and Indonesia Malaysia the Philippines Singapore Thailand and Vietnam in Southeast Asia pose a critical regional and global sustainability challenge in this area of continuing rapid urban based industrial growth It is the most polluted region in the world Whilst being at the leading edge of the processes of urbanization industrialization and globalization these economies are in the midst not at the end of their urban industrial transformations During the next 25 years urban populations in the region are expected roughly to double and most of the industrial capital stock that will be on the ground by 2030 has not yet been built Given East Asia's growing size in the world's economy and ecology and its increasingly polluted environment this looming urban industrial transformation is both a challenge and an opportunity Unless steps are taken now to make this transformation more sustainable East Asia's and the world's environmental future is likely to deteriorate seriously Using detailed case studies and rigorous empirical analyses Rock and Angel leading experts in this field show that East Asian governments have found institutionally unique ways to overcome the sustainability challenge As a result of these findings they demonstrate how even low income economies in the rest of the world can use regulatory policies industrial policies and an openness to trade and foreign investment that will increase the competitiveness of their firms whilst improving their environmental performance thus proving an important antidote to those who argue that poor countries cannot afford to clean up their environment whilst their economies remain under developed

Investing in Peace Robert J. Muscat, 2015-05-20 International intervention in internal wars has gained rhetorical legitimacy in the post cold war period but in practice it has remained problematic Response to these conflicts has remained mainly diplomatic and military and belated Is there anything international actors can do to prevent or at least ameliorate

such conflicts Are conflict prevention measures already being attempted and sometimes succeeding so well that we are unaware of their effectiveness If so what can we learn from them In this book Robert J Muscat a veteran international development expert who has worked in South America South and Southeast Asia East Africa and the Balkans attempts to answer these questions Drawing on the work of others as well as his own extensive experience he reviews the accrued insights into the causes of internal conflict He examines nine cases in which the work of development agencies exacerbated or ameliorated the root causes of conflict This permits some generalizations about the efficacy or deleterious effects of development programs and of their futility when the conflict prevention dimension of international assistance efforts is ignored

Managing Intermediate Size Cities M. Romanos, C. Auffrey, 2013-04-17 I am both pleased and honored to introduce this book to readers and I want to take a few moments to explain why Michael Romanos and Christopher Auffrey have produced a volume which will be of immense value to several different types of people Planners and other specialists concerned with the development of the Southeast Asian region and the issues and opportunities associated with urban growth and sustainable development will find much to interest them in this book But the book I believe has much wider appeal and that is what I want to touch on briefly here The University of Cincinnati where Michael Chris and I work is attempting to globalize itself to develop its institutional capacity for international activities to infuse its curriculum with international themes and to promote and increase global competence among its graduates Many American universities are doing this of course In the process we are seeing some very interesting experiments in pedagogy as faculty look for learning moments in new and sometimes exotic places Michael Chris and their colleagues have it seems to me developed an outstanding model for learning across national and cultural boundaries In the chapters which follow you will read the results of their work What will be less apparent however is the process by which that work was produced

International Banking Crises Benton E. Gup, 1999-10-30 The financial crises that began unexpectedly in Southeast Asia in 1997 spread rapidly around the globe causing banks to fail stock markets to plummet and other newsmaking disruptions Gup and his contributors examine these failures and crises in the main arenas where they occurred Thailand Indonesia South Korea Russia Argentina and provide some important answers to the critical questions these frightening events raised The result is a readable easily grasped study of issues relating to bank failure and the effectiveness of bank regulation and important reading for academics and practitioners alike In July 1997 Thailand devalued its currency This one event sparked financial crises that spread with astonishing speed from Southeast Asia around the world to Russia Even in the United States and South America the impact was felt Southeast Asia had been considered a model in fact a miracle of economic growth No one foresaw the crises that soon occurred there and the severity and contagion of these crises raised questions globally What happened Why And what can we do about it Gup and his contributors offer some answers to these critical questions Gup and his panel finally conclude that government actions were at the root of these crises Banks were pawns in the hands of

governments and banks helped fuel the booms that ultimately burst booms supported by investments from other countries around the world not incidentally Gup goes on to lay out other provocative questions among them How effective are bank regulations And how do we resolve failed and insolvent banks The result is an important contribution to the literature in banking finance investment and the role government plays in these activities a book not only for academics but for practitioners and informed laymen as well Uneven Development in South East Asia Chris Dixon,David

Drakakis-Smith,2019-03-25 First published in 1997 this volume responds to the rapid change in mid 1980s South East Asia exploring the uneven distribution of development within the region and providing broad coverage of different aspects of this unevenness at both the regional and national levels Specialists in economics geography planning and South East Asian studies contribute on issues including ethnicity and development in Malaysia disadvantaged groups in Singapore and the impact of social and historical forces on uneven development in the region **Changing Visions of East Asia, 1943-93**

R.B. Smith,2006-09-27 This fascinating work draws together a lifetime of research by highly regarded scholar Ralph Bernard Smith who at the time of his death in December 2000 was examining the post war changes in East Asian politics economics and society The Institutional Foundations of East Asian Economic Development Y. Hayami,M. Aoki,1998-12-13 The International Economic Association was foremost in reviving professional economists concern with institutions and their impact in publications such as Economic Institutions in a Dynamic Society 1989 This volume concentrates on the states whose development has been characterised as the East Asian miracle in the light of the performance of other economies starting from similarly low income levels including India China African states especially Nigeria and Latin American countries including Brazil This comprehensive comparative survey in economic history demonstrates the external shocks and interacting domestic forces which constituted the growth dynamic Nobel Laureates Kenneth Arrow and Douglass North and past President of the IEA the late Michael Bruno are among the thirty four highly distinguished specialist contributors

States in the Global Economy Linda Weiss,2003-02-13 The growing interconnectedness of national economies and an expanding awareness of global interdependence in the 1990s have generated lively debate over the future of national governance In a world of mobile capital are states vital to the social and economic wellbeing of their citizens A number of changes in the state s domestic and international environment ranging from regulatory reforms and welfare state restructuring to the proliferation of intergovernmental agreements have promoted the view that globalisation has a negative impact compromising state capacities to govern domestically This book challenges the constraints thesis Covering vital areas of state activity welfare taxation industrial strategy and regulatory reform the contributors focus on a range of issues finance trade technology faced by both developed and developing countries The contributors argue that globalisation can enable as well as constrain and they seek to specify the institutional conditions which sharpen or neutralise the pressures of interdependence **Southeast Asia Transformed** Chia Lin Sien,2003 Southeast Asia with a total population of 520 million

remains a region characterized by fragmentation diversity and considerable internal conflict despite the unifying influence of the Association of Southeast Asian Nations ASEAN formed some thirty five years ago In the new millennium it has lost the distinction of being one of the world s faster growing group of economies since the 1997 financial crisis While it has benefited from the winds of globalization it has now to cope with the painful adjustments to problems that stem from the inadequacies of good governance and structural changes This volume brings together the combined insights of specialists who have worked and lived in the region The theme of the book is change and transformation The authors identify the trends and forces that propel the region along and then bring in discussions on key issues In some cases they offer their views on the future of the region and recommendations for solutions The intention of the book is to offer a scholarly review of the region s development over the past half century and to provide a firm basis for forecasting its further evolution in the new millennium
