Love in the Gardens of Macantar Lisa Acor Laurel, 2011-05 LISA ACOR LAUREL knows firsthand the necessity of letting go of relationships that aren't working, letting go and moving on to mystery, adventure and fulfillment. In this memoir, she narrates her escape from an abusive relationship and how she found healing and self-discovery through her faith and trust in God. *Love in the Gardens of Macantar* delivers a series of personal journal entries chronicling Laurel's journey from codependency, addiction, self-pity and blame to a life of happiness, contentment and taking responsibility for her actions. It captures her progress through one year of healing and it sheds light on Laurel's inner self, the great significance of her journey and how she found her true passion in gardening. Inspiring and uplifting, Laurel's testimony offers hope for a prosperous, productive and fulfilling life after leaving an abusive relationship. Realizing that happiness is not a luxury, it is a responsibility. *Love in the Gardens of Macantar* shows there is a new beginning after the end. **The Greening of**

Architecture Phillip James Tabb, A. Senem Deviren, 2017-03-02 Contemporary architecture and the culture it reflects dependent as it is on fossil fuels, has contributed to the cause and necessity of a burgeoning green process that emerged over the past half century. This text is the first to offer a comprehensive critical history and analysis of the greening of architecture through accumulative reduction of negative environmental effects caused by buildings, urban designs and settlements. Describing the progressive development of green architecture from 1960 to 2010, it illustrates how it is ever evolving and ameliorated through alterations in form, technology, materials and use, and it examines different places worldwide that represent a diversity of cultural and climatic contexts. The book is divided into seven chapters with an overview of the environmental issues and the nature of green architecture in response to them, followed by an historic perspective of the pioneering evolution of green technology and architectural integration over the past five decades, and finally providing the intransigent and culturally pervasive current examples within a wide range of geographic territories. The greening of architecture is seen as an evolutionary process that is informed by significant world events, climate change, environmental theories, movements in architecture, technological innovations and seminal works in architecture and planning throughout each decade over the past fifty years. This time period is bounded on one end by the awareness of environmental problems beginning in the 1960s, the influential texts by Rachel Carson, E. F. Schumacher, Buckminster Fuller and Steward Brand, and the impact of the OPEC Oil Embargo of 1973, and on the other end, the pervasiveness of the necessary greening of architecture that includes systemic reforms in architectural and urban design, land use planning, transportation, agriculture and energy production found in the 2000s. The greening process moves from remediation to holistic models of architecture. Geographical landscapes give a global account of the greening process where some examples are parallel and sympathetic and others are in clear contrast to one another with very individuated approaches. Certain events like the Rio Summit in 1992 and Kyoto Protocol in 1997 and themes such as the Hannover Principles in 2000 provide a dynamic ideological critique as

well as a formal and technical discussion of the embodied and accumulative content of greening principles in architecture

The Nature of Magic Susan Greenwood,2020-06-03 This book examines how and why practitioners of nature religion Western witches druids shamans seek to relate spiritually with nature through magical consciousness Magic and consciousness are concepts that are often fraught with prejudice and ambiguity respectively Greenwood develops a new theory of magical consciousness by arguing that magic ultimately has more to do with the workings of the human mind in terms of an expanded awareness than with socio cultural explanations She combines her own subjective insights gained from magical practice with practitioners in depth accounts and sustained academic theory on the process of magic She also tracks magical consciousness in philosophy myth folklore story telling and the hi tech discourse of postmodernity and asks important questions concerning nature religion's environmental credentials such as whether it is as inherently ecological as many of its practitioners claim

Energetic Cellular Healing and Cancer Tjitze de Jong,2021-02-16 A guide to the psychological causes of cancer and how energetic healing can assist in a mind body cure Unravels the psychological aspects of an individual s energetic defense system with a focus on cancer and provides insight into how energetic distortions in our physical and energetic bodies can lead to illness Explores where possible energetic blocks might develop and how energetic cellular healing techniques can assist in dissolving them Shares intimate cancer journeys from individuals the author has worked with As a complementary energy healer Tjitze de Jong has supported hundreds of clients during their journey with cancer over the past 15 years In Energetic Cellular Healing and Cancer he provides insight into the functioning of our cells and our immune system and how energetic distortions in our physical as well as energetic bodies for example in our chakras
