## The First Of Alaska:

Alaska's First Bush Pilots, 1923-30 Jim Rearden, 2014-04-04 This book follows the careers of Alaska's pioneering pilots who with cranky open cockpit biplanes started the great change in Alaska's way of travel. Aviation first arrived at Fairbanks, the trade center of mainland Alaska from which dog sled trails spider web to mines, villages and trap lines. During winters goods and people traveled mostly by dog sled. During the summer of 1923 Ben Eielson was the first to fly commercially from Fairbanks ferrying passengers and light freight with an open cockpit Jenny JN4 biplane. It was the beginning of the leap from ground travel to the air. Noel Wien was the next. In the summers of 1924-26 he flew open cockpit biplanes from Fairbanks. Starting in 1927 he flew a cabin biplane year around on scheduled flights in the 579 miles between Fairbanks and Nome. In March 1929 Wien flew from Alaska to the Elisif, an ice locked trading schooner in Siberia to return with a load of valuable furs. In the following November Ben Eielson repeated this flight to the Nanuk, another ice bound trading schooner in Siberia. And when he and his mechanic Earl Borland returned for a second load of Siberian fur their Hamilton airplane disappeared in a winter snowstorm. This brought on one of the most famous and difficult aerial searches ever made from and in Alaska. By the 1930s Alaska's growing aviation industry had revolutionized transportation in the Territory. This volume is a fond look back at the triumphs and tragedies of the pioneering Ben Eielson, Noel Wien, Harold Gillam, Joe Crosson, Ed Young and others, the great pilots who were the first bush pilots of Alaska. *The Alaska Almanac* Nancy Gates, 2013-11-01 Those looking for facts about Alaska turn to Alaska's best known and trusted fact book, The Alaska Almanac. **Alaska's Skyboys** Katherine Johnson Ringsmuth,2015-10-01 This fascinating account of the development of aviation in Alaska examines the daring missions of pilots who initially opened up the territory for military positioning and later for trade and tourism Early Alaskan military and bush pilots navigated some of the highest and most rugged terrain on earth taking off and landing on glaciers mudflats and active volcanoes Although they were consistently portrayed by industry leaders and

lawmakers alike as cowboys and their planes compared to settlers covered wagons the reality was that aviation catapulted Alaska onto a modern global stage the federal government subsidized aviation s growth in the territory as part of the Cold War defense against the Soviet Union Through personal stories industry publications and news accounts historian Katherine Johnson Ringsmuth uncovers the ways that Alaska s aviation growth was downplayed in order to perpetuate the myth of the cowboy spirit and the desire to tame what many considered to be the last frontier      **Proceedings of the First Conference on Scientific Research in the National Parks, New Orleans, Louisiana, November 9-12, 1976** Robert M.
