Engineering News, 2003 **Conserving the Emerald Tiger** George Taylor, 2006-07-21 In *Conserving the Emerald Tiger* Taylor reveals the way in which the environmental politics embrace issues that are at the very heart of Irish democracy state intervention economic growth and environmental conservation and political protest Examining these issues the author argues that while the Irish state recognized the need to revamp environmental policy with the creation of the Environmental Protection Agency in 1992 its principal aim was to ensure that further more stringent regulation would not be detrimental to the economic performance of the Emerald Tiger Bibliographic Index, 1997 The Impact of Environmental Regulation on Competitiveness in the German Manufacturing Industry Ursula Triebswetter, 2004 This study examines in three case studies whether German plants suffer from a negative impact on competitiveness caused by stringent environmental legislation A micro level analysis showed that abatement initiatives had in general been implemented without economic damage and did not touch on the core business Moreover German sample plants ranked environmental pressure as relatively unimportant compared with other competitive pressures Finally the low absolute levels of compliance costs at least in two of the case studies explained why environmental regulation cannot have a great influence on competitiveness in the chosen sectors High productivity levels were not among the essential factors explaining our findings It implies for our case studies that also plants with lower productivity can withstand high compliance costs The British National Bibliography Arthur James Wells, 1998
