Twerski,1998 Denial of addiction is the most prominent symptom of individuals who have problems with alcohol and substance abuse Whatever its psychodynamics their denial is reinforced by 1 fear that acknowledgment and treatment might jeopardize their professional status and 2 the misconception that intellectual superiority constitutes a safeguard against loss of control High achievers doctors lawyers business executives clerics nurses professors are particularly vulnerable to such denial Moreover their spouses may share the fear that exposure could jeopardize and even undermine the family s livelihood Some people become high achievers or overachievers in order to compensate for feelings of inadequacy and unworthiness These feelings almost invariably surface in the substance abuser antedating the onset of abuse A particular challenge in treating this population is to address the negative consequences of low self esteem without crippling the impulse to excel Dr Twerski demonstrates that chemical dependency is indeed an equal opportunity destroyer and he illuminates the makeup of high achieving substance abusers as their narratives unfold Addicted individuals will recognize themselves in these pages while providers of human services will discover ways and means to diagnose and intervene      *Video Source Book* Gale Group,1999-10-28 A guide to programs currently available on video in the areas of movies entertainment general interest education sports recreation fine arts health science business industry children juvenile how to instruction
