The Foreign Trade of Mainland China Feng-hwa Mah,1971 *The Foreign Trade of Mainland China* Mah Feng-Hwa,1969 *The Foreign Trade of China* Gene T. Hsiao,2023-04-28

The Foreign Trade of China Policy Law and Practice is a comprehensive study that delves into the complexities of China's foreign trade since the founding of the People's Republic of China in 1949. The book explores the institutional frameworks, laws, trade policies, and practices that have shaped China's trade relations, particularly with the United States. The study is especially relevant in the context of the normalization of Sino-American relations in the 1970s, a period when trade became a central avenue of communication between the two nations despite political tensions. Gene T. Hsiao examines China's foreign trade objectives in relation to broader policy goals, offering insights into the various state trading corporations, legal contracts, and dispute resolution mechanisms that govern trade in China. Hsiao provides a detailed account of China's economic exchanges using a wide range of sources, including government documents, trade agreements, and interviews with officials and business executives. He also discusses the challenges faced by American businesses attempting to engage with China, particularly the unique negotiating style and the Chinese reluctance to adapt to capitalist marketing techniques. Despite these challenges, Hsiao highlights the satisfaction many American traders have experienced in their dealings with China, emphasizing the growing importance of trade as a means of fostering Sino-American relations. The book offers both an academic and practical guide for understanding the intricacies of China's foreign trade and provides crucial context for those looking to navigate the complexities of trade with one of the world's most influential economies. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. C. Hsu, 1989 Recent events in China have revealed a nation struggling to reconcile its new thinking with its traditional institutions and practices This book provides an assessment of one aspect of the reform process the foreign trade system The reforms in China have heralded a new openness in Chinese economic policy In this book his first full length work on the subject Dr Hsu investigates the impact of the reforms on China s foreign trade and consequently on the domestic economy In the process he examines such issues as the role of foreign trade in China s economic development the institutional changes involved in the foreign trade reforms and the efficiency of the new foreign trade incentive system He then evaluates the possibilities for further foreign trade reforms in the future In conclusion Dr Hsu suggests that Chinese enterprises have been slow to respond to changes in domestic and international market conditions and that exposure to foreign markets has exacerbated inflation problems in the Chinese economy As a result he finds that China has not enjoyed the full potential benefits of its reform program This book will be of interest to economists political scientists Asian studies specialists and others interested in the economic ramifications of China s reform process It is a timely and thorough account of this crucial aspect of reform and an important addition to the growing body of literature on the restructuring of modern communist states
