The Oxford Handbook of Religion and American Politics Corwin E. Smidt,Lyman A. Kellstedt,James L. Guth,2017 Over the past three decades the study of religion and politics has gone from being ignored by the scholarly 7ommunity to being a major focus of research Yet because this important research is not easily accessible to nonspecialists much of the analysis of religion s role in the political arena that we read in the media is greatly oversimplified This Handbook seeks to bridge that gap by examining the considerable research that has been conducted to this point and assessing what has been learned what remains unsettled due to conflicting research findings and what important questions remain largely unaddressed by current research endeavors The Handbook is unique to the field of religion and American politics and should be of wide interest to scholars students journalists and others interested in the American political scene

Saving Souls, Serving Society Heidi Rolland Unruh,Ronald J. Sider,2005-10-06 Recent years have seen unprecedented attention to faith based institutions as agents of social change spurred in part by cuts in public funding for social services and accompanied by controversy about the separation of church and state The debate over faith based initiatives has highlighted a small but growing segment of churches committed to both saving souls and serving society What distinguishes faith based from secular activism How do religious organizations express their religious identity in the context of social services How do faith based service providers interpret the connection between spiritual methodologies and socioeconomic outcomes How does faith motivate and give meaning to social ministry Drawing on case studies of fifteen Philadelphia area Protestant churches with active outreach Saving Souls Serving Society seeks to answer these and other pressing questions surrounding the religious dynamics of social ministry While church based programs often look similar to secular ones in terms of goods or

services rendered they may show significant differences in terms of motivations desired outcomes and interpretations of meaning Church based programs also differ from one another in terms of how they relate evangelism to their social outreach agenda Heidi Rolland Unruh and Ronald J Sider explore how churches navigate the tension between their spiritual mission and the constraints on evangelism in the context of social services The authors examine the potential contribution of religious dynamics to social outcomes as well as the relationship between mission orientations and social capital Unruh and Sider introduce a new vocabulary for describing the religious components and spiritual meanings embedded in social action and provide a typology of faith based organizations and programs Their analysis yields a framework for Protestant mission orientations that makes room for the diverse ways that churches interrelate spiritual witness and social compassion Based on their observations the authors offer a constructive approach to church state partnerships and provide a far more objective understanding of faith based social services than previously available *Free to Serve* Stephen V. Monsma, Stanley W. Carlson-Thies, 2015-10-06 What do Hobby Lobby InterVarsity Christian Fellowship Wheaton College World Vision the Little Sisters of the Poor and the University of Notre Dame have in common All are faith based organizations that have faced pressure to act in ways contrary to their religious beliefs In this book two policy experts show how faith based groups those active in the educational healthcare international aid and development and social service fields can defend their ability to follow their religiously based beliefs without having to jettison the very faith and faith based practices that led them to provide services to those in need They present a pluralist vision for religious freedom for faith based organizations of all religious traditions The book includes case studies that document the challenges faith based organizations face to freely follow the practices of their religious traditions and analyzes these threats as originating in a common yet erroneous set of assumptions and attitudes prevalent in American society The book also includes responses by diverse voices an Orthodox Jew a Roman Catholic two evangelicals two Islamic leaders and an unbeliever who is a religious freedom advocate underscoring the importance of religious freedom for faith based organizations **Pluralism and Freedom** Stephen V. Monsma, 2012 Faith based organizations play a major role in providing a host of health educational and social services to the public Nearly all these efforts however have been accompanied by intense debate and numerous legal challenges The right of faith based organizations to hire based on religion the presence of religious symbols and icons in rooms where government subsidized services are provided and the enforcement of gay civil rights to which some faith based organizations object all continue to be subjects of intense debate and numerous court cases In *Pluralism and Freedom* Stephen V Monsma explores the question of how much autonomy should faith based organizations retain when they enter the public realm He contends that pluralism and freedom demand their religious freedom be respected but that freedom of all religious traditions and of the general public and secular groups be equally respected ideals that neither the left nor the right live up to In response Monsma argues that democratic pluralism requires a genuine authentic but also a limited autonomy for faith based organizations

providing public services and offers practical concrete public policy applications of this framework in practice **Religion and Space** Lily Kong, Orlando Woods, 2016-02-11 This is the first study to bring space into conversation with religious competition conflict and violence in the contemporary world Lily Kong and Orlando Woods argue that because space is both a medium and an outcome of religious activity it is integral to understanding processes of religious competition conflict and violence The book explores how religious groups make claims to both religious and secular spaces and examines how such claims are managed negotiated and contested by the state and by other secular and religious agencies It also examines how globalisation has given rise to new forms of religious competition and how religious groups strengthen themselves through the development of social resilience as well as contribute to resilient societies Throughout the book case studies from around the world are used to examine how religious competition and conflict intersect with space The case studies include topical issues such as competing claims to the Temple Mount Haram el Sharif in Jerusalem opposition to the Ground Zero mosque in New York City and the regulation of religious conversion in India and Sri Lanka By helping readers develop new perspectives on how religion works in and through space **Religion and Space Competition Conflict and Violence in the Contemporary World** is an innovative contribution to the study of religion **Improving Head Start Act of 2007 : report , Managing Diversity in Today's Workplace** Michele A.
