Film and the Nuclear Age Toni A. Perrine, 2019-01-22 Just as we generally pay scant attention to the potential dangers of nuclear power and nuclear war until quite recently scholars have made limited critical attempts to understand the cultural manifestations of the nuclear status quo Films that feature nuclear issues most often simplify and trivialize the subject They also convey a sense of the ambivalence and anxiety that pervades cultural responses to our nuclear capability The production of popular narrative films with nuclear topics largely conforms to periods of heightened nuclear awareness or fear such as the fear of fallout from nuclear testing manifested in the atomic creatures in science fiction movies of the late 1950s By their very numbers and through a set of recurring stylistic and narrative conventions nuclear films reflect a deep seated cultural anxiety This study includes detailed textual analysis of films that depict nuclear issues including the development and use of the first atomic bombs nuclear testing and the fear of fallout nuclear power the Cold War arms race loose nukes and future nuclear war and its aftermath Includes bibliographic references index filmography chronology Illustrated Contemporary Futurist Thought Thomas Lombardo, 2006-06-23 Contemporary Futurist Thought describes recent thinking about the future dealing with both the hopes and the fears expressed in modern times concerning what potentially lies ahead There are many such hopes and fears perhaps an overpowering number competing with each other and swirling about in the collective mind of humanity Psychologist and futurist Tom Lombardo describes this mental universe of inspiring dreams and threatening premonitions regarding the future The book begins with an in depth examination of the highly influential literary genre of science fiction which Dr Lombardo identifies as the mythology of the future He next describes the modern academic discipline of future studies which attempts to apply scientific methods and principles to an understanding of the future Social and technological trends in the twentieth century are then reviewed setting the stage for an analysis of the great contemporary transformation occurring in our present world Given the powerful and pervasive changes taking place across the globe and throughout all aspects of human life the questions arise Where are we potentially heading and perhaps more importantly where should we be heading The final chapter provides an extensive review of different answers to these questions Describing theories and approaches that highlight science technology culture human psychology and religion among other areas of focus as well as integrative views which attempt to provide big pictures of all aspects of human life the book provides a rich and broad overview of contemporary ideas and visions about the future In the conclusion Dr Lombardo assesses and synthesizes these myriad perspectives proposing a set of key ideas central to understanding the future This book completes the study of future consciousness begun in its companion volume *The Evolution of Future Consciousness* These two volumes rich in historical detail and concise observations on the interrelatedness of a wide range of

interdisciplinary topics are a significant contribution to the field of future studies and a valuable resource for educators consultants and anyone wishing to explore the significance of thinking about the future *Indie Science Fiction Cinema Today* Kathleen Fernandez-Vander Kaay,Chris Vander Kaay,2018-02-13 Much of 20th century science fiction foretold technological and social developments beyond the year 2000 Since then a key theme has been what happens when the future no one anticipated arrives faster than anyone expected Focusing on 21st century independent science fiction films the author describes a seismic shift in subject matter as society moves into a new technological age Independent films since the millennium are more daring incisive and even plausible in their depiction of possible futures than blockbuster films of the same period Twenty one chapters break down today s subgenres featuring interviews with the filmmakers who created them

Future Consciousness Thomas Lombardo,2006-06-23 Are there any unique qualities that humans possess that make us special within the world of nature Since the beginnings of recorded history we have pondered this question What if many of humanitys highest qualities and unique achievements such as technology civilization morals self consciousness freedom of choice religion and science are all built upon a single distinctive human capacity It may be that our highly evolved mental power to envision and think about the future is at the core of our greatest accomplishments and most unique human attributes In *The Evolution of Future Consciousness* psychologist and futurist Tom Lombardo examines the human ability to be conscious of the future to create ideas images goals and plans about the future to think about these mental creations and use them in directing ones actions and ones life In the opening chapter he looks at the psychology of future consciousness and its values and benefits as well as ways to enhance this human ability Subsequent chapters describe the emergence of future consciousness in pre historic times and how it was critical in the development of love and bonding the family tools and human aggression and hunting the central importance of the future and time in early myths religions and classical philosophy and the rise of modern futurist thinking covering the Renaissance the Scientific Revolution the Western Enlightenment and the Romantic counter reaction The book concludes with Darwin and how the theory of evolution revolutionized humanitys conception of both the past and the future In its companion volume *Contemporary Futurist Thought* Tom Lombardo completes his survey of the historical development of future consciousness discussing significant ideas and approaches to the future in the last century including science fiction future studies and an extensive array of recent theories and paradigms of
