The Future Of Industrial Societies Convergence Or Continuing Diversity:

The Future of Industrial Societies Clark Kerr, 1983 Kerr seeks to analyze whether industrial societies are evolving into one dimensional socially constricted homogenized victims of a triumphant technology or whether they will merely share economics based on science technology and capital while independent in political forms and social goals He approaches the subject by disaggregating societies into nine component parts to test the convergence hypothesis Examining forces that impel or impede convergence in each part he finds six segments tending toward convergence and three favoring diversity He demonstrates that there is an overall movement toward convergence but the greatest barriers to it are the irreconcilable social goals of governments He also presents the views of Saint Simon Marx Hayek Tinbergen Herbert Marcuse and Daniel Bell on the question ISBN 0 674 33850 2 16 50
