The Future Of The Family:

The Future of the Family Daniel Patrick Moynihan, Timothy Smeeding, Lee Rainwater, 2004-10-06 High rates of divorce single parenthood and nonmarital cohabitation are forcing Americans to reexamine their definition of family This evolving social reality requires public policy to evolve as well The Future of the Family brings together the top scholars of family policy headlined by editors Lee Rainwater Tim Smeeding and in his last published work the late Senator Daniel Patrick Moynihan to take stock of the state of the family in the United States today and address the ways in which public policy affects the family and vice versa The volume opens with an assessment of new forms of family discussing how reduced family income and lower parental involvement can disadvantage children who grow up outside of two parent households The book then presents three vastly dissimilar recommendations each representing a different segment of the political spectrum for how family policy should adapt to these changes Child psychologist Wade Horn argues the case of political conservatives that healthy two parent families are the best way to raise children and therefore should be actively promoted by government initiatives Conversely economist Nancy Folbre argues that government's role lies not in prescribing family arrangements but rather in recognizing and fostering the importance of caregivers within all families conventional or otherwise Will Marshall and Isabel Sawhill borrow policy prescriptions from the left and the right arguing for more initiatives that demand personal responsibility from parents as well as for an increase in workplace flexibility and the establishment of universal preschool programs The book follows with commentary by leading policy analysts Samuel Preston Frank Furstenberg Jr and Irwin Garfinkel on the merits of the conservative and liberal arguments Each suggests that marriage promotion alone is not enough to ensure a happy healthy and prosperous future for American children who are caught up in the vortex of family change They agree that government investments in children however can promote superior developmental outcomes and even potentially encourage traditional families by enlarging the pool of marriageable individuals for the next generation No government action can reverse trends in family formation or return America to the historic nuclear family model But understanding social change is an essential step in fashioning effective policy for today's families With authoritative insight The Future of the Family broadens and updates our knowledge of how public policy and demography shape one another

The Future of Family Farms Teresa Opheim,2016-09-01 A monumental transfer of farmland is occurring in the United States The average American farmer is fifty eight years old and the 40 percent of farmland owners who lease their land to others are even older sixty six on average Five times as many farmers are over sixty five as are under thirty five What will happen to this land Who will own it What if one child wants to farm but can t afford to buy out the nonfarming siblings What if keeping the farm in the family means foregoing the significant profits that could be earned from selling it These sometimes painful and divisive questions confront many farmers and farmland owners today How they answer them will shape their families and the land for generations to come The Farm Legacy Letters project developed by the member driven nonprofit Practical Farmers of Iowa is designed to help farmers and farmland owners think about their farm s future and talk about it with their families An essential complement to handbooks on business succession this book gathers the letters and stories of midwestern families about the land they cherish how they acquired it what they treasure most about it and their hopes for its future Some of the writers descend from families who have owned a particular patch of the earth since the 1800s while others became farmland owners more recently one as recently as 2015 Some are no longer farmland owners at all because after careful thought about what mattered most to them they sold their land to the next generation of farmers All of these writers hope that by sharing their farmland legacies they will encourage others to ponder and then write about the histories accomplishments challenges and hopes for their farmland for the generations who come after they are gone

Future of Work, Work-Family Satisfaction, and Employee Well-Being in the Fourth Industrial Revolution Abe, Ethel Ndidiamaka,2020-11-13

Disruptions are being caused in the workplace due to the development of advanced software technology and the speed at which these technological advancements are being produced

These disruptions could take diverse forms and affect various aspects of work and the lives of entities in the workplaces and families of the individual employees. Work and family are caught in the crossfire between technological disruptions and human adaptation. Hence, there is a need to assess the overall effect that the Fourth Industrial Revolution would have on work, employee work, family satisfaction, and employee well-being. *Future of Work: Work, Family Satisfaction, and Employee Well-Being in the Fourth Industrial Revolution* is a critical reference source that discusses practical solutions and strategies to manage challenges and address fears regarding the effect of the Fourth Industrial Revolution on the future of employment and the workforce. Featuring research on topics such as corporate governance, job satisfaction, and mental health, this book is ideally designed for human resource professionals, business managers, industry professionals, government officials, policymakers, corporate strategists, consultants, work-life balance experts, human resources, software developers, business policy experts, academicians, researchers, and students.

Family Business: Building a sustainable future

AA.VV., 2024-03-20T00:00:00+01:00

This work commemorates the twenty-fifth anniversary of the founding of the Italian Association of Family Enterprises (AIDAF). It does not adopt a retrospective perspective nor is it a historical account. It is an essay about the future, taking the form of a dialogue between family businesses and the Italian academic community, combining scholarly rigor with pragmatism. It provides tangible points of reflection aimed at constructing and subsequently preserving the continuity and sustainability of the family enterprise system. The dialogue is composed of twenty-five letters and their corresponding responses, organized into five sections: family ownership, youth business, and sustainability. The AIDAF-affiliated entrepreneurs pose inquiries on family business matters in the form of letters addressed to academics, who in turn provide concise essays in response. These exchanges encompass recurring issues such as generational succession, as well as more contemporary themes such as sustainability and the management of large entrepreneurial families. The essay is not solely intended for AIDAF members; rather, it has been assembled to initiate a conversation with those who are involved with family businesses, including the new generations, entrepreneurs, managers, and professionals who collaborate with family.

enterprises as well as students and enthusiasts of the subject It is an invitation to those who harbor a curiosity about the world of family business As in any dialogue the hope here is to stimulate interest in continuing the exchange of perspectives experiences and knowledge going beyond the pages of this book and recognizing that the vitality and excellence of the fabric of family enterprises are fundamental for the development of a national system
