The Complete Plant Selection Guide for Landscape Design Marc C. Stoecklein, 2011-03-15 This book is a quick and easy-to-use reference guide for choosing plant material for landscape designs. This reference manual includes comprehensive lists with search criteria for each of the major plant groups, including trees, shrubs, groundcovers, perennials, vines, grasses, and ferns. These plant groups contain hundreds of specific species, varieties, and cultivars that are readily available in the marketplace from the major production nurseries. Landscape architects, designers, contractors, or anyone who designs with plants can easily choose plants that will work on their site. The book is technical enough for the professional yet simple enough to be used by the layperson. Both botanical and common names are used, and an extensive amount of cultural and environmental information is presented. While many other books of this kind give only basic information such as sun, shade, height, width, there are so many as 30 specific categories for each plant group. The categories cover such important criteria as light and soil requirements, zone, hardiness, height, and width, pest

and disease susceptibility urban tolerance and tolerance to salt and drought The lists also include many criteria often overlooked such as growth rates overall messiness root systems minimal fall clean up maintenance levels soil PH and landscape value use and many visual characteristics such as texture foliage color and fall colors bloom colors and seasons shapes and forms attractive bark and foliage and more There is also a candid Pros Cons section covering some realistic considerations for each of the plant species groups
