**Forthcoming Books** Rose Arny, 2003 *Beyond the Iraq War* Michael Heazle, Iyanatul Islam, 2006-01-01 This book critically analyses the topic of US led external interventions in the affairs of developing countries by using one of the most contested experiments of modern times namely the invasion of Iraq and its aftermath The March 2003 invasion of Iraq has so far failed to deliver the benefits and outcomes its supporters anticipated prompting international discussion as to whether the promises of externally led nation building as an attempt to mould rogue states in a democratic market friendly fashion are outweighed by the kinds of pitfalls and perils of intervention that have come to characterise the Iraq experience This book identifies and addresses the major issues emerging from the current debate including the evolution of external interventionism as an idea an explanation of what went wrong in post Saddam Iraq and why the Iraq

experiment is flawed by the Bush administration's refusal to address long standing political and historical grievances among Muslims as part of the War on Terror. The contributors assess the troubled relationship between Islam and the West, the prospects for democracy in the Middle East, foreign policy debates in the US and how economics and politics are juxtaposed in a highly contentious manner in any project of externally driven nation building. Beyond the Iraq War brings together scholars and practitioners in an attempt to move beyond the polemical dimensions of the existing debate and provide a balanced analysis of what the Iraq enterprise can tell us about the brand of external interventionism espoused by the Bush administration and also the lessons it holds for any future interventions into the affairs of states. It combines a mix of disciplines most notably international relations and economics as well as theory and empirical evidence. The book is written in a non technical but rigorous manner in order to make complex and diverse issues accessible to the general reader. This fascinating and scholarly work will appeal to academics and scholars in the fields of political economics, political science and international relations. Policymakers, journalists and media commentators will also find this work to be of great interest and value.

Depression is second after heart disease as the most damaging health condition in the world. The NHS has devoted huge resources to training thousands of psychological therapists to work in Improving Access to Psychological Therapies services specifically to treat depression in adults and couple therapy has been identified as one of the effective ways of treating it. Couple Therapy for Depression is an integrative 20 session couple therapy designed to treat depression in couples where there is also relationship distress. Following the recommendations of the UK's National Institute for Clinical Excellence for a behaviourally based couple therapy treatment, it draws on RCT studies of efficacy as well as best practice in behavioural, cognitive, emotionally focused, systemic and psychodynamic couple therapies. Sticking closely to the competencies identified for the treatment of depression and relationship distress in couples, it outlines the ways in which couple therapists can reduce damaging interactions between couples, build emotional openness and closeness, improve communication and behaviour, change unhelpful cognitions and perceptions and help the couple cope with the ordinary and not so ordinary stresses that arise in the course of everyday relating. Written by couple therapists who understand deeply the unique challenges of doing therapy with couples, it is based on the training programme for Couple Therapy for Depression commissioned by the NHS for use in its Improving Access to Psychological Therapies services. It begins by describing the causes and consequences of depression and then focuses on its impact on the adult couple. Highlighting the particular techniques needed in safe and effective work with distressed couples, it goes through the different ways in which the couple's feelings, thoughts and behaviours need to be understood and worked with in order to reduce relationship distress. It outlines the treatment of 4 different couples to illustrate the therapy in action and will be helpful for any therapist wanting to
