*The First Farmers of Central Europe* Penny Bickle, Alasdair Whittle, 2013-07-09 From about 5500 cal BC to soon after 5000 cal BC the lifeways of the first farmers of central Europe the LBK culture Linearbandkeramik are seen in distinctive practices of longhouse use settlement forms landscape choice subsistence material culture and mortuary rites Within the five or more centuries of LBK existence a dynamic sequence of changes can be seen in for instance the expansion and increasing density of settlement progressive regionalisation in pottery decoration and at the end some signs of stress or even localised crisis Although showing many features in common across its very broad distribution however the LBK phenomenon was not everywhere the same and there is a complicated mixture of uniformity and diversity This major study takes a strikingly large regional sample from northern Hungary westwards along the Danube to Alsace in the upper Rhine valley and addresses the question of the extent of diversity in the lifeways of developed and late LBK communities through a wide ranging study of diet lifetime mobility health and physical condition the presentation of the bodies of the deceased in mortuary ritual It uses an innovative combination of isotopic principally carbon nitrogen and strontium with some oxygen osteological and archaeological analysis to address difference and change across the LBK and to reflect on cultural change in general

**Last Hunters, First Farmers** Theron Douglas Price, Anne Birgitte Gebauer, 1995 During virtually the entire four million year history of our habitation on this planet humans

have been hunters and gatherers dependent for nourishment on the availability of wild plants and animals Beginning about 10 000 years ago however the most remarkable phenomenon in the course of human prehistory was set in motion At locations around the world over a period of about 5 000 years hunters became farmers Far more than the domestication of plant and animal species was involved in this revolution which was accompanied by massive changes in the structure and organization of the societies that adopted agriculture and by a totally new relationship with the environment Whereas hunter gatherers live off the land in an extensive fashion exploiting a diversity of resources over a broad area farmers utilize the landscape intensively The implications of these changes in human activity and social organization reverberate down to the present day The case studies presented here ranging from the Far East to the American Southwest provide a global perspective on contemporary research into the origins of agriculture Downplaying more traditional explanations of the turn to agriculture such as the influence of marginal environments and population pressures the contributors to this volume emphasize instead the importance of the resource rich areas in which agriculture began the complex social organizations already in place the role of sedentism and in some locales the advent of economic intensification and competition This volume resulted from an advanced seminar held at the School of American Research in Santa Fe New Mexico Contributors include Ofer Bar Yosef Anne Birgitte Gebauer Charles Higham Lawrence H Keeley Richard H Meadow Deborah M Pearsall T Douglas Price Bruce D Smith Patty Jo Watson and W H Wills

**Ancestral Journeys: The Peopling of Europe from the First Venturers to the Vikings (Revised and Updated Edition)** Jean Manco, 2016-02-16 An ambitious and lucid full narrative account of the peopling of Europe this will undoubtedly provide a base line for future debates on the origins of the Europeans J P Mallory author of In Search of the Indo Europeans and The Origins of the Irish Who are the Europeans Where did they come from New research in the fields of archaeology and linguistics a revolution in the study of genetics and cutting edge analysis of

ancient DNA are dramatically changing our picture of prehistory leading us to question what we thought we knew about these ancient peoples This paradigm shifting book paints a spirited portrait of a restless people that challenges our established ways of looking at Europe s past The story is more complex than at first believed with new evidence suggesting that the European gene pool was stirred vigorously multiple times Genetic clues are also enhancing our understanding of European mobility in epochs with written records including the arrival of the Anglo Saxons the spread of the Slavs and the adventures of the Vikings Now brought completely up to date with all the latest findings from the fast moving fields of genetics DNA and dating Jean Manco s highly readable account weaves multiple strands of evidence into a startling new history of the continent of interest to anyone who wants to truly understand Europeans place in the ancient world

*Ancestral Journeys: The Peopling of Europe from the First Venturers to the Vikings* Jean Manco,2013-10-07 Incorporates the latest discoveries and theories from archaeology genetics history and linguistics to paint a spirited history of European settlement Who are the Europeans and where did they come from In recent years scientific advances have released a mass of data turning cherished ideas upside down The idea of migration in prehistory so long out of favor is back on the agenda New advances allow us to track human movement and the spread of crops animals and disease and we can see the evidence of population crashes and rises both continent wide and locally Visions of continuity have been replaced with a more dynamic view of Europe s past with one wave of migration followed by another from the first human arrivals in Europe to the Vikings Ancient DNA links Europe to its nearest neighbors It is not a new idea that farming was brought from the Near East but genetics now reveal an unexpectedly complex process in which farmers arrived not in one wave but several Even more unexpected is the evidence that the European gene pool was stirred vigorously many times after farming had reached most of Europe Climate change played a part in this upheaval but so did new inventions such as the c and wheeled vehicles Genetic and linguistic clues also enhance our understanding of the upheavals of the Migration Period the wanderings of steppe nomads and the adventures of the Vikings
