The First Men In The Moon:

The First Men in the Moon H. G. Wells, 2016-12-22 My next clear recollection is that we were prisoners at we knew not what depth beneath the moon's surface At the village of Lympe on the south coast of England the most uneventful place in the world the failed playwright Mr Bedford meets the brilliant inventor Mr Cavor and together they invade the moon Dreaming respectively of scientific renown and of mineral wealth they fashion a sphere from the gravity defying substance Cavorite and go where no human has gone before They expect a dead world but instead they find lunar plants that grow in a single day giant moon calves and the ant like Selenites the super adapted inhabitants of the Moon's utopian society The First Men in the Moon is both an inspired and imaginative fantasy of space travel and alien life and a satire of turn of the century Britain and of utopian dreams of a wholly ordered and rational society The First Men in the Moon Herbert George Wells, 1995 The most dazzling of Wells' scientific romances and the last of the series that began with The Time Machine this edition offers the only annotated version of The First Men in the Moon Wells combines subtle comedy and thrilling adventure in this engaging satire of imperialism and human frailty in which the heroes invade the moon only to be captured by the ant like Selenites Wells established a new level of the science fiction genre with his fantastical but subtle writing The explanatory notes in this edition clarify Wells' rich allusions and elucidate the scientific aspects of the moon voyage **The First Men in the Moon** H. G. [The First Men in the Moon](#) H. G. Wells,2013-11-25 This is the annotated edition including the rare biographical essay by Edwin E Slosson called H G Wells A Major Prophet Of His Time The book is also fully illustrated with a wealth of beautiful drawings There is probably no other living writer than the author of The War of the Worlds whose brain possesses that abnormal twist requisite to the production of such a story as The First Men In the Moon The conception of a planet peopled by a race of articulated creatures gigantic insects endowed with something akin to human intelligence whose entire life is passed not upon the moon s surface but miles below it In chambers and passages hollowed out after the fashion of a colossal ant hill all this described with that touch of verisimilitude which is the one thing which makes H G Wells readable gives an uncanny at times almost ghastly effect that makes this moon story the most weird and striking of anything that he has written since the days of The Time Machine He takes us on endless rambles through these vast lunar caverns lit only by the pallid rays that come from streams of liquid blue fire and shows us a world in which the forests are colossal growths of pink and blue and green mushrooms and the commonest utensils of everyday life are made of solid gold It is a curious whimsical book and as usual Mr Wells has been doubly fortunate in having a sympathetic illustrator Mr Shepperson s pictorial interpretations of the text are thoroughly in keeping with the whole spirit of the thing and make the various phases of this imaginary moon life sufficiently vivid to haunt one with the persistence of a nightmare
