Strategic Giving Peter Frumkin, 2008-09-15 The philanthropic landscape is changing dramatically as a new generation of wealthy donors seeks to leave its mark on the public sphere Peter Frumkin reveals in *Strategic Giving* why these donors could benefit from having a comprehensive plan to guide their giving And with this thoughtful and timely book he provides the much needed framework to understand and develop this kind of philanthropic strategy After listening for years to scores of individual and institutional funders discuss the challenges of giving wisely Frumkin argues here that contemporary philanthropy requires a thorough rethinking of its underlying logic Philanthropy should be seen he contends as both a powerful way to meet public needs and a meaningful way to express private beliefs and commitments He demonstrates that finding a way to simultaneously fulfill both of these functions is crucial to the survival of philanthropy and its potential to support pluralism in society And he goes on to identify the five essential elements donors must consider when developing a philanthropic strategy the vehicle through which giving will flow the way impact will be achieved the level of engagement and profile sought the time frame for giving and the underlying purpose of the gift Frumkin's point is that donors must understand strategic giving as the integration of these five critical dimensions to giving Essential reading for donors researchers and anyone involved with the world of philanthropy *Strategic Giving* provides a new basis for understanding philanthropic effectiveness and a promising new way for philanthropy to achieve the legitimacy that has at times eluded it

The Road to Stockholm István Hargittai,2003-08-28 The Nobel Prize is by far the highest recognition a scientist may receive and the only one with which the general public is familiar Its prestige has reached improbable heights At the same time a lot of myth surrounds the Nobel Prize and this is compounded by the fact that people tend to view scientists with some bewilderment This book introduces the process of selection of the laureates discusses the ingredients for scientific discovery and for getting recognition It reviews the decisive moments of scientific careers en route to the Nobel Prize points to characteristic features of the laureates the importance of mentors and venues in scientific careers and other components of success It also covers some discoverers and discoveries for whom and for which the Nobel Prize never materialized Whereas there is no general recipe for receiving the Nobel Prize there are common features of successful scientific careers The book reveals some information about the scientists lives and careers that may guide other scientists in increasing their chances of becoming more effective and better recognized players although it is not expected to help anyone to receive the Nobel Prize For the general reader The Road to Stockholm reveals the human face of scientists and the human side of their endeavours The Nobel Prize has served as inspiration for scientists and the general public for a hundred years this book discusses its problems and celebrates its triumphs

British and Irish Paintings in Public

Collections Christopher Wright, Catherine May Gordon, 2006-01-01 This book sets a new standard as a work of reference. It covers British and Irish art in public collections from the beginning of the sixteenth century to the end of the nineteenth and it encompasses nearly 9 000 painters and 90 000 paintings in more than 1 700 separate collections. The book includes as well pictures that are now lost some as a consequence of the Second World War and others because of deaccessioning mostly from 1950 to about 1975 when Victorian art was out of fashion. By listing many tens of thousands of previously unpublished works including around 13 000 which do not yet have any form of attribution this book becomes a unique and indispensable work of reference one that will transform the study of British and Irish painting. *Finding Funding* Ernest W.

Brewer, 2001-01-24 The materials collected, developed and compiled in this volume are mostly related to grant proposal development for education but the push for uniformity in grants among the various federal agencies means that the materials have wider application. Some of the ideas and tips may be of general interest and value to a grantwriter; some ideas about project management should benefit anyone operating a project. The book is divided into three major parts and several additional supporting sections. Part I discusses the planning and some of the major tools of the trade needed to get started in the grant project field and to use the Internet to access funding resources. Part II covers some important steps in developing a successful grant application. Part III discusses both closing out a project annually and the often difficult but realistic element of terminating the project at the end of external support. This handbook includes problem definition, analysis of need, goals and objectives, activities, some management details, timelines, personnel, budget, reports, evaluation and dissemination of results. The work is about exploring, writing, implementing and terminating an idea as a strong proposal and as an operating project. Appendixes include list, abbreviations, state points of contact and a glossary. Contains 51 references. DFR.
