The Foundation Of Philosophy:

The Foundations of Philosophy Michael Pol Macneil, 2025-06-03 This work is about philosophy and what makes a philosophy distinctively Christian in character arguing that it is indeed possible for philosophy to be conceived of as first Christian and not just philosophy done by people that happen to be Christians Christian philosophy is epistemologically self conscious philosophy conducted in a manner honoring to the revelation of the Hebrew and Christian scriptures It is argued that philosophy should be transformative rather than just therapeutic or elucidatory The author examines competing philosophical and scientific accounts from both the empiricist and rationalist schools arguing they are coherent and successful only to the degree that they have imported consciously or unconsciously Christian transcendentals He then applies this insight to explore the character and practice of a Christian political philosophy **Max Horkheimer and the**

Foundations of the Frankfurt School John Abromeit, 2011-10-10 This book is the first comprehensive intellectual biography of Max Horkheimer during the early and middle phases of his life 1895 1941 Drawing on unexamined new sources John Abromeit describes the critical details of Horkheimer s intellectual development This study recovers and reconstructs the model of early Critical Theory that guided the work of the Institute for Social Research in the 1930s Horkheimer is remembered primarily as the co author of *Dialectic of Enlightenment* which he wrote with Theodor W Adorno in the early 1940s But few people realize that Horkheimer and Adorno did not begin working together seriously until the late 1930s or that the model of Critical Theory developed by Horkheimer and Erich Fromm in the late 1920s and early 1930s differs in crucial ways from *Dialectic of Enlightenment* Abromeit highlights the ways in which Horkheimer s early Critical Theory remains relevant to contemporary theoretical discussions in a wide variety of fields *Scepticism Ant the Foundation of*

Epistemology Luciano Floridi, 1996 The sceptical challenge known as the problem of the criterion is one of the major issues in the history of epistemology This volume provides its first comprehensive study in a span of time that goes from Sextus Empiricus to Quine **The Foundation of Reality** David Glick, George Darby, Anna Marmodoro, 2020-04-29 Are space and

time fundamental features of our world or might they emerge from something else *The Foundation of Reality* brings together metaphysicians and philosophers of physics working on space time and fundamentality to address this timely question Recent developments in the interpretation of quantum mechanics and the understanding of certain approaches to quantum gravity have led philosophers of physics to propose that space and time might be emergent rather than fundamental But such discussions are often conducted without engagement with those working on fundamentality and related issues in contemporary metaphysics This book aims to correct this oversight The diverse contributions to this volume address topics including the nature of fundamentality the relation of space and time to quantum entanglement and space and time in theories of quantum gravity Only through consideration of a range of different approaches to the topic can we hope to get clear on the status of space and time in our contemporary understanding of physical reality *Philosophical Foundation of*

Plato and the Foundations of Metaphysics Hans Joachim Krämer, 1990-01-01 This is a book about the relationship of the two traditions of Platonic interpretation the indirect and the direct traditions the written dialogues and the unwritten doctrines Kramer who is the foremost proponent of the Tübingen School of interpretation presents the unwritten doctrines as the crown of Plato's system and the key revealing it Kramer unfolds the philosophical significance of the unwritten doctrines in their fullness He demonstrates the hermeneutic fruitfulness of the unwritten doctrines when applied to the dialogues He shows that the doctrines are a revival of the presocratic theory renovated and brought to a new plane through Socrates In this way Plato emerges as the creator of classical metaphysics In the Third Part Kramer compares the structure of Platonism as construed by the Tübingen School with current philosophical structures such as analytic philosophy Hegel phenomenology and Heidegger Of the five appendices the most important presents English translations of the ancient testimonies on the unwritten doctrines These include the self testimonies of Plato There is also a bibliography on the problem of the unwritten doctrines

The Foundations of Information Systems Andrew Basden, 2017-10-24 Why does information technology disappoint or enslave us Why do so many information systems projects

collapse How can we do better There are many technical social economic and other aspects to consider How do we ensure we take all these into account as we research ITC or employ them ICT affects our lives and world more profoundly than ever before How may we understand it This book employs philosophy to lay foundations for understanding the complexity of ICT in five areas The nature of information and computers and artificial intelligence The use of ICT at work and home for serious and less serious use The ICT features that annoy or delight us Societal issues such as surveillance e government ICT in developing countries climate change what technological progress is and what is the role of ICT as a whole and of the information systems field ICT development including computer programming knowledge engineering and project management The ideas in this book emerge from five decades of experience of the author with ICT across industry the professions and academic life Information systems researchers will enjoy this book because it offers them new ideas and fresh perspectives On the 500th anniversary of the European Reformation this book introduces and applies the Reformational Philosophy of mid 20th century Dutch thinker Herman Dooyeweerd to contemporary challenges of the 21st century Excitingly this accessible philosophy is grounded in everyday experience and yields a rich seedbed of ideas which researchers and practitioners can develop to their advantage *Philosophy and the Spontaneous Philosophy of the Scientists* Louis Althusser, 2012-01-16 The publication in 1965 of *For Marx* and *Reading Capital* established Louis Althusser as one of the most original and controversial figures in the Western Marxist tradition a thinker whose renewal of Marxism was to enjoy great influence over the next decade Collected here are Althusser's most significant philosophical writings from 1965 to 1978 the majority previously untranslated Intended to contribute in his own words to a left wing critique of Stalinism that would help put some substance back into the revolutionary project here in the West they are the record of a shared history At the same time they chart Althusser's critique of the theoretical system unveiled in his own major works and his developing practice of philosophy as a revolutionary weapon The collection opens with two lucid early articles *Theory Theoretical Practice* and *Theoretical Formation and On Theoretical Work* The title piece *Althusser's celebrated lectures in the Philosophy Course for Scientists* is the fullest exploration of his new definition of philosophy as politics in the realm of theory a conception which is further developed in *Lenin and Philosophy* *Is it Simple to be a Marxist in Philosophy* provides an invaluable account of Althusser's intellectual development The volume concludes with two little known late pieces *The Transformation of Philosophy* in which the paradoxical history of Marxist philosophy is investigated and *Marxism Today* a sober balance sheet of the Marxist tradition Attesting to the unique place which Althusser has occupied in modern intellectual history between a tradition of Marxism which he sought to reconstruct and a post Marxism which has eclipsed its predecessor these texts are indispensable reading **Kant and the Foundations of Morality** Halla Kim, 2015-02-26 Halla Kim explores the leading themes in Kant's philosophical ethics from a structural methodological point of view to highlight the activities of reason vis vis the blind forces of brute nature Basing the study on Kant's short but monumental *Groundwork* of

the Metaphysics of Morals Kim also draws on other major writings by Kant and his critics Kim shows that philosophical ethics as Kant conceived it must capture the gist of the ineluctable inescapable and irreducible freedom we strive to exemplify in our practical lives Viewed this way the moral law is none other than the law of the will determining itself It is the law of the self activity of the will Contending that the concepts and doctrines in Kant s ethics should be understood as an ethics of the self activity of the will Kim argues that the categorical imperative is the particular way this moral law is addressed to finite rational beings Kant and the Foundations of Morality provides new perspective on the philosopher s thought to benefit studies of eighteenth century philosophy epistemology modern philosophy moral theory moral philosophy and ethics *The Foundations of Equal Employment Opportunity* ,1972 **The Journal of Speculative Philosophy** ,1875 **Preacher and Homiletic Monthly** ,1912 *Containing book III., chapter VI. and last, The foundations of ethic. And book IV, The real universe* Shadworth Hollway Hodgson,1898 **The Encyclopaedia Britannica** Thomas Spencer Baynes,1884 **Political Philosophies and Nation-Building in Cameroon** Aseh Andrew,2016-10-15 This is a comprehensive text on the function of thought in the history and political sociology of Cameroon The book brings out how the hidden hand of history fashions a political thought which in turn creates its own history Instead of Cameroonians making history history makes Cameroonians The book shows how political ideas are fashioned in a post colonial context in which Europeans impose a superordinate arrangement on a people together with its philosophers Thinking the nation in Cameroon on behalf of Europeans especially after the leaders of the national liberation struggle were all eliminated European philosophers put in place a repressive machine under which Cameroonians were subjected between 1958 and 1990 Repression gave way to a refined form of enslavement a modernised version of slavery Cameroonians joined the bandwagon and have been producing and reproducing Western industrial economies while day dreaming of what they will never become The whole idea of nation building in post colonial Africa is put in question This book offers students of political studies sociology anthropology and history compelling evidence to grapple with questions as to whether Cameroon is a state or a nation and questions of sovereignty and citizenship Hegel's Phenomenology of Spirit Martin Heidegger,1988-08-22 The text of Martin Heidegger s 1930 1931 lecture course on Hegel s Phenomenology of Spirit contains some of Heidegger s most crucial statements about temporality ontological difference and dialectic and being and time in Hegel Within the context of Heidegger s project of reinterpreting Western thought through its central figures Heidegger takes up a fundamental concern of Being and Time a dismantling of the history of ontology with the problematic of temporality as a clue He shows that temporality is centrally involved in the movement of thinking called phenomenology of spirit Political Philosophies and Nation-Building in Cameroon Andrew, Aseh,2016-10-15 This is a comprehensive text on the function of thought in the history and political sociology of Cameroon The book brings out how the hidden hand of history fashions a political thought which in turn creates its own history Instead of Cameroonians making history history makes Cameroonians The book shows how political ideas are fashioned in a post

colonial context in which Europeans impose a superordinate arrangement on a people together with its philosophers
Thinking the nation in Cameroon on behalf of Europeans especially after the leaders of the national liberation struggle were
all eliminated European philosophers put in place a repressive machine under which Cameroonians were subjected between
1958 and 1990 Repression gave way to a refined form of enslavement a modernised version of slavery Cameroonians joined
the bandwagon and have been producing and reproducing Western industrial economies while day dreaming of what they
will never become The whole idea of nation building in post colonial Africa is put in question This book offers students of
political studies sociology anthropology and history compelling evidence to grapple with questions as to whether Cameroon is
a state or a nation and questions of sovereignty and citizenship Private Foundations United States. Congress. Senate.
