Of Time, Passion, and Knowledge Julius Thomas Fraser, 2021-03-09 Only a wayfarer born under unruly stars would attempt to put into practice in our epoch of proliferating knowledge the Heraclitean dictum that men who love wisdom must be inquirers into very many things indeed Thus begins this remarkable interdisciplinary study of time by a master of the subject And while developing a theory of time as conflict J T Fraser does offer many things indeed an enormous range of ideas about matter life death evolution and value

**Manifesto of Evolutionary Humanism** Michael Schmidt-Salomon,2014-09-10 We are living in a time of asynchrony While technologically we are firmly in the 21st century our world views are still characterized by ancient legends which are thousands of years old This combination of high level technical ability and highly na ve child like beliefs could have disastrous consequences in the long run We are behaving like five year olds who have been given responsibility for a jumbo jet One of the most depressing problems of our time lies in religious fundamentalists of all stripes casually making use of the fruits of the Enlightenment freedom of expression constitutionality science technology in order to prevent its principles being applied to the domain of their own belief For example to further their beliefs the 9 11 terrorists used airplanes constructed on the basis of scientific principles principles to which their beliefs could never stand up In return the fundamentalist with other means George W Bush led the world into a devastating crusade against terror and the axis of evil making use of a technology which could never have been developed if scientists had contented themselves with the American President s child like faith that the Bible s creation account is true In the face of the dangers arising from the renaissance of unenlightened thinking in a technologically highly developed era it is a matter of intellectual integrity to speak out clearly especially where religion is

concerned Anyone who is capable of splitting the atom and communicating via satellites must possess intellectual and emotional maturity That certain people or groups of persons avoid exposure to criticism by establishing holy i e untouchable rules and uphold their fallacies as mandatory for all time may and can no longer be accepted practice in a modern society

**The Market and Public Choices** Alfonso Salinas,2018-01-12 This title was first published in 2003 This book assumes a viewpoint practically absent from contemporary economics and readdresses the first fundamental question of economics how should we decide how scarce resources should be allocated among competing uses By focusing on this question the book necessarily reconstitutes the link between ethics and economics Thus the book deals with a crucial topic the moral assessment of the market mechanism as a tool for allocating scarce resources The key tenet of the book is that the market achieves ends that transcends itself ends that must remain the prerogative of civil society Questions of the foundations of moral philosophy are considered allocating scarce resources is shown to be an exclusively human capacity which means that the market is unable to determine such issues endogenously An intuitionist approach to moral philosophy is developed and this is placed in the context of the history of western moral philosophy The argument encompasses mathematical logic philosophy of mind moral philosophy and economics This key book will appeal to anyone interested in Economics and Ethics and the role of the state

**The Fourth Source** Robert J. Tuttle,2012 This book describes how the effects of nature s own nuclear reactors have shaped the Earth the Solar System the Universe and the history of life as we know it It focuses on observed effects that are poorly explained by our standard theories identifies certain errors in those theories and shows how these effects are caused by natural nuclear fission reactors The theory of Plate Tectonics is wrong and it is shown that expansion of the Earth causes continental drift A physically reasonable mechanism is proposed for expansion and observational data are presented to show that this occurs Evolution is explained as punctuated equilibrium with mutations caused by abrupt surges of radiation and related life forms that have been interpreted as separate species are

actually the result of radiation injury This view is particularly effective as applied to humans The ability of the dinosaurs to live so large is explained by use of Earth Expansion and a more massive atmosphere to provide buoyancy and effective transpiration of oxygen These effects also explain how pterodactyls and ancient birds could fly Expansion induced by impacts at the end of the Cretaceous caused the atmosphere to thin and the dinosaurs collapsed Analysis of geological and biological data supports this The astronomical distance scale is shown to be wrong based on the misconception that trigonometric parallax is an absolute measurement It isn't and the method is led astray by the overwhelming number of asteroidal fragments masquerading as stars The measurements of an expanding Universe are shown to be in error and an expanding Universe is not needed by an alternative interpretation of Einstein's equations This interpretation is based on the equal creation of matter and antimatter which is known to occur Spiral galaxies are not vast Island Universes of stars as we have thought but are shown to be the strewn fields of debris from the nuclear fission detonation of distant planets The Universe is not made up of 96% Dark Matter and Dark Energy but is instead very ordinary Abundant evidence and references provide support for all these interpretations This book opens new opportunities for research by correcting several fundamental errors in our concepts of the Earth Life and the Universe      *Capturing Imagination* Carlo Severi, 2018-11-01 We have all found ourselves involuntarily addressing inanimate objects as though they were human For a fleeting instant we act as though our cars and computers can hear us In situations like ritual or play objects acquire a range of human characteristics such as perception thought action or speech Puppets dolls and ritual statuettes cease to be merely addressees and begin to address us we see life in them How might we describe the kind of thought that gives life to the artifact making it memorable as well as effective in daily life play or ritual action Following The Chimera Principle in this collection of essays Carlo Severi explores the kind of shared imagination where inanimate artifacts from non Western masks and ritual statuettes to paintings and sculptures in our own tradition can be perceived as living beings This nuanced inquiry into the works of memory and shared imagination is a proposal for a new anthropology of thought      **A History of Western Civilization: Foundations of western civilization** William John Bossenbrook, 1939      **The City of Hermes** John Michael Greer, 2019-11-30 A collection of essays on magic and occultism The essays and articles collected in this volume sum up the first not quite decade of John Michael Greer's career While they cover a range of subjects all of them share a common theme and were shaped by certain experiences that remade his spiritual life just before the first of them was written They record a remarkable period in the life of a scholar and will provide inspiration and entertainment to students of the occult as well as anyone interested in magic or writing      **Genesis and Development of Plekhanov's Theory of Knowledge** D. Steila, 2012-12-06 1 One of the most outstanding leaders within Second International Marxism George Plekhanov has interested Western scholars primarily as a historical and political figure specifically as the first full fledged Marxist among the Russian intelligentsia At the end of the nineteenth century he was the leader in putting Russian progressive culture in touch with Western Marxism breaking away

from Populism and at the same time resuming materialistic tradition within Russian progressive thought Among Russian revolutionaries a few others to be sure had been interested in Marx before Plekhanov The translations of some of Marx works into Russian show this clearly In 1869 Mikhail Bakunin translated The Communist Manifesto Three years later Nikolaj Daniel son a populist completed the first foreign language version of the first book of Marx Capital and within six months about a thousand copies had been sold In the middle of the 1870 s an academic economist N Ziber helped to spread Marx economic ideas by teaching them in Kiev and writing articles in the journal Slovo which to some extent influenced Plekhanov s later choices But it was Plekhanov who first analyzed the Russian situation as a whole in Marxist terms thereby earning renown as the Father of Russian Marxism 1 His writings became the school for a whole generation of revolutionaries At the beginning respected and venerated then rejected and criticized Plekhanov for long held the leadership of Russian Marxism as its best known Master

Black Jews in Africa and the Americas Tudor Parfitt, 2013-02-04 Parfitt explains how many African peoples came to think of themselves as descendants of the ancient tribes of Israel Pursuing medieval and modern race narratives over a millennium in which Jews were cast as black and black Africans were cast as Jews he reveals a complex interaction between religious and racial labels and their political uses
