associations and key websites **The Most Important Fish in the Sea** H. Bruce Franklin, 2007-04-01 In this brilliant portrait of the oceans unlikely hero H Bruce Franklin shows how menhaden have shaped America's national and natural history and why reckless overfishing now threatens their place in both Since Native Americans began using menhaden as fertilizer this amazing fish has greased the wheels of U S agriculture and industry By the mid 1870s menhaden had replaced whales as a principal source of industrial lubricant with hundreds of ships and dozens of factories along the eastern seaboard working feverishly to produce fish oil Since the Civil War menhaden have provided the largest catch of any American fishery Today one company Omega Protein has a monopoly on the menhaden reduction industry Every year it sweeps billions of fish from the sea grinds them up and turns them into animal feed fertilizer and oil used in everything from linoleum to health food supplements The massive harvest wouldn't be such a problem if menhaden were only good for making lipstick and soap But they are crucial to the diet of bigger fish and they filter the waters of the Atlantic and Gulf coasts playing an essential dual role in marine ecology perhaps unmatched anywhere on the planet As their numbers have plummeted fish and birds dependent on them have been decimated and toxic algae have begun to choke our bays and seas In Franklin's vibrant prose the decline of a once ubiquitous fish becomes an adventure story an exploration of the U S political economy a groundbreaking history of America's emerging ecological consciousness and an inspiring vision of a growing alliance between environmentalists and recreational anglers *The Quest for the Golden Trout* Douglas M. Thompson, 2013-09-22 The angler's dream of fishing pristine waters in unspoiled country for sleek healthy trout has turned fishing into a form of theater It is a manufactured experience much to the detriment of our rivers and streams Americans love of trout has reached a level of fervor that borders on the religious Federal and state agencies as well as nongovernmental lobbying groups invest billions of dollars on river restoration projects and fish stocking programs Yet their decisions are based on faulty logic and risk destroying species they are tasked with protecting River ecosystems are modified with engineered structures to improve fishing native species that compete with trout are eradicated and nonnative invasive game fish are indiscriminately introduced genetically modified and selectively bred to produce more appealing targets for anglers including the freakishly contrived golden trout *The Quest for the Golden Trout* is about looking at our nation's rivers with a more critical eye and asking more questions about both historic and current practices in fisheries management **The Final Four of Everything** Mark Reiter, Richard Sandomir, 2009-12-15 Edited by Mark Reiter and Richard Sandomir and featuring contributions from experts on everything from breakfast cereal and movie gunfights to First Ladies and bald guys *The Final Four of Everything* celebrates everything that's great surprising or silly in America using the foolproof method of bracketology to determine what we love or hate and why As certain to make you laugh as it will start friendly arguments *The Final Four of Everything* is the perfect book for know it alls know a little and anyone with an opinion on celebrity mugshots literary heroes sports nicknames or bacon Bracketology is a unique way of organizing information that dates back to the rise of the knockout or

single elimination tournament perhaps in medieval times Its origins are not precisely known but there was genius in the first bracket design that hasn't changed much over the years You of course may be familiar with the bracket format via the NCAA basketball tournament pairings each March If you've ever watched ESPN or participated in a March Madness office pool you know what a bracket looks like The Final Four of Everything takes the idea one step further and applies the knockout format to every category BUT basketball In areas where taste judgment and hard earned wisdom really matter we've set out to determine truly the Final Four of Everything

At the Glacier's Edge Betsy McCully, 2024-05-17 Vast salt marshes ancient grasslands lush forests pristine beaches and dunes and copious inland waters all surrounded by a teeming sea These are probably not the first things you imagine when you think of Long Island but just beyond its highways and housing developments lies a stunning landscape full of diverse plant and animal life Combining science writing environmental history and first hand accounts from a longtime resident At the Glacier's Edge offers a unique narrative natural history of Long Island Betsy McCully tells the story of how the island was formed at the end of the last ice age how its habitats evolved and how humans in the last few hundred years have radically altered and degraded its landscape Yet as she personally recounts the habitat losses and species declines she has witnessed over the past few decades she describes the vital efforts that environmental activists are making to restore and reclaim this land from replanting salt marshes to preserving remaining grasslands and forests to cleaning up the waters At the Glacier's Edge provides an in depth look at the flora fauna and geology that make Long Island so special

Westwood & T. Satchell. [With] A list of books to supplement the Bibliotheca piscatoria Thomas Westwood, 1883 Magill's Literary Annual 2003 Salem Press, 2003-06 Magill's Literary Annual 2003 is the fiftieth publication in a series that began in 1954 The philosophy behind the annual has been to evaluate critically 200 major examples of serious literature published during the previous year Our focus is to provide coverage for works that are likely to be of particular interest to the general reader that reflect the publishing trends of a given year that add to careers of authors being taught and researched in literature programs and that will stand the test of time By filtering the thousands of books published each year down to two hundred notable titles the editors have provided the busy librarian with an excellent reader's advisory tool and patrons with fodder for book discussion groups and a guide for selection The essay reviews in the Annual also provide a more academic reference review of a work than is typically found in newspapers and other periodical sources

This year's works are drawn from such categories as anthropology autobiography biography current affairs diaries economics environment essays history language literary criticism medicine memoirs nature philosophy poetry psychology religion science short fiction sociology technology travel and women's issues. The articles are arranged alphabetically by book title. A complete list of included titles can be found at the beginning of volume 1. Each 2,000 word article begins with a block of top matter that indicates the title author publisher and price of the work. When possible the year of the author's birth is also provided. The top matter also includes the number of pages of the book the type of work and when appropriate the time period and locale represented in the text. Next comes a capsule description of the work. When pertinent a list of principal characters or personages with brief descriptions introduces the review. These original essay reviews analyze intent and relative success of the author and the work under discussion. To assist the reader further the articles are supplemented by a list of additional reviews for further study. Every essay includes a brief biography of the author or authors and thumbnail photographs of the book covers and authors are included as available. At the end of volume 2 are four cumulative indexes listing works covered from the years 1977 to 2003: an index of Biographical Works by Subject a Category Index a Title Index and an Author Index. The index of Biographical Works by Subject is arranged by subject rather than by author or title.

The Encyclopedia of New York State Peter Eisenstadt, 2005-05-19. The Encyclopedia of New York State is one of the most complete works on the Empire State to be published in a half century. In nearly 2,000 pages and 4,000 signed entries this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas as a cradle of abolitionism and feminism and as an apex of modern urban suburban and rural life. The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history. Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi? New York is the only state to border both the Great Lakes and the Atlantic Ocean; the Erie Canal opened New York City to rich farmland upstate and to the west. Entries by experts chronicle New York's varied areas politics and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads weaving the state's diverse regions and peoples into one idea of New York State. Lavishly illustrated with 500 photographs and figures 120 maps and 140 tables the Encyclopedia is key to understanding the state's past present and future. It is a crucial reference for students teachers historians and business people for New Yorkers of all persuasions and for anyone interested in finding out more about New York State.
