Freedom and Rationality F. D'Agostino, Ian Jarvie, 1989-08-31 x philosophy when he inaugurated a debate about the principle of methodological individualism a debate which continues to this day and which has inspired a literature as great as any in contemporary philosophy Few collections of material in the general area of philosophy of social science would be considered complete unless they contained at least one of Watkins's many contributions to the discussion of this issue In 1957 Watkins published the first of a series of three papers 1957b 1958d and 1960a in which he tried to codify and rehabilitate metaphysics within the Popperian philosophy placing it

somewhere between the analytic and the empirical. He thus signalled the emergence of an important implication of Popper's thought that had not to that point been stressed by Sir Karl himself and which marked off his followers from the antimetaphysical ideas of the regnant logical positivists. In 1965 years of work in political philosophy and in the history of philosophy in the seventeenth century were brought to fruition in Watkins's widely cited and admired Hobbes's System of Ideas (1965a, second edition 1973d). This book is an important contribution not just to our understanding of Hobbes's political thinking but perhaps more importantly to our understanding of the way in which a system of ideas is constituted and applied. Watkins built on earlier work in developing an account of Hobbes's ideas in which was revealed and clarified the unity of Hobbes's metaphysical, epistemological and political ideas.
