C. Vann Woodward, 1989 **Tense** Bernard Comrie, 1985-06-06 Bernard Comrie introduces readers to the range of variation found in tense systems across the languages of the world **Time and Space** Barry Francis Dainton, 2010-01-01 Surveying both historical debates and modern physics Barry Dainton evaluates the central arguments in a clear and unintimidating way that keeps conceptual issues comprehensible to students with little scientific or mathematical training and makes the philosophy of space and time accessible to anyone trying to come to grips with the complexities of this challenging subject With over 100 original line illustrations and a full glossary of terms Time and Space keeps the requirements of students firmly in sight and will continue to serve as the ideal textbook for philosophy of time and space courses ***Intensive Bulgarian*** Ronelle Alexander, Olga M. Visions of the Future in Roman Frontier Kingdoms 100 BCE-100 CE Richard Teverson, 2024-09-03 This is the first book length exploration of the ways art from the edges of the Roman Empire represented the future examining visual representations of time and the role of artwork in Roman imperial systems This book focuses on four kingdoms from across the empire Cottius's Alpine kingdom in the north King Juba II's Mauretania in the south west Herodian Judea in the east and Kommagene to the north east Art from the imperial frontier is rarely considered through the lens of the aesthetics of time and Roman provincial art and the monuments of allied rulers are typically interpreted as evidence of the interaction between Roman and local identities In this interdisciplinary study which explores statues wall paintings coins monuments and inscriptions readers learn that these artworks served as something more they were created to represent the futures that allied rulers and their people foresaw The pressure of Roman imperialism drove patrons and artists on the empire's borders to imbue their creations with increasingly sophisticated ideas about the future as they wrestled with consequential decisions made under periods of intense political pressure Comprehensively illustrated and providing an important new approach to Roman material culture at the edge of empire *Visions of the Future in Roman Frontier Kingdoms 100 BCE 100 CE* is suitable for students and scholars working on Rome and its frontiers as well as Roman material culture more broadly and those studying the aesthetics of time in art and art history

Being and Nothingness Jean-Paul Sartre, 2021-09-07 Revisit one of the most important pillars in modern philosophy with this new English translation the first in more than 60 years of Jean Paul Sartre's seminal treatise on existentialism This is a philosophy to be reckoned with both for its own intrinsic power and as a profound symptom of our time The New York Times In 1943 Jean Paul Sartre published his masterpiece *Being and Nothingness* and laid the foundation of his legacy as one of the greatest twentieth century philosophers A brilliant and radical account of the human condition *Being and Nothingness* explores what gives our lives significance In a new and more accessible translation this foundational text argues that we alone create our values and our existence is characterized by freedom and the inescapability of choice Far from being an internal passive container for our thoughts and experiences human consciousness is constantly projecting itself into the outside world and imbuing it with meaning Now with a new foreword by Harvard professor of philosophy Richard Moran this clear eyed translation guarantees that the groundbreaking ideas that Sartre introduced in this resonant work will continue to inspire for generations to come

The Future of the Past Alexander Stille, 2002 We now have better technology than ever before for studying and preserving the past but at the same time this very technology threatens to destroy monuments works of arts and ways of life that have survived thousands of years of hardship and war This study

describes the high tech struggle to protect the Great Sphinx and the Ganges efforts to preserve Latin within the Vatican and the digital glut inside the US National Archives critical projects Throughout his focus is not just on the past but on our ideas about the past how they are changing and how they will have to change if our past is to have a future **How to Be an Existentialist** Gary Cox,2011-09-29 A concise and humorous introduction to existentialism aimed squarely at a general readership and available in paperback for the first time *The Principles of Causal Conspiracy (book 1)* Michael M. Dunmire,2011 This monograph examines the rhetorical nature and function of representations of the future in political discourse focusing on political actors use of hegemonic images of future reality to achieve their political goals It argues that a key ideological dimension of political rhetoric lies in politicians use of projections of the future to legitimate policies and actions This argument is grounded in systemic functional and critical discourse analyses of the Bush Doctrine the U S policy response to the September 11 terrorist attacks which sanctioned a preemptive military posture By focusing on the discursive construction of the future this project addresses a lacunae in critical discourse studies and calls attention to the crucial role that the discourse and practice of futurology has played in post Cold War politics and society It will be of value to scholars interested in the discourses of politics the war on terror U S national security and futurology *Knowing Future Time In and Through Greek Historiography* Alexandra Lianeri,2016-03-07 From the early modern period Greek historiography has been studied in the context of Cicero s notion *historia magistra vitae* and considered to exclude conceptions of the future as different from the present and past Comparisons with the Roman Judeo Christian and modern historiography have sought to justify this perspective by drawing on a category of the future as a temporal mode that breaks with the present In this volume

distinguished classicists and historians challenge this contention by raising the question of what the future was and meant in antiquity by offering fresh considerations of prognostic and anticipatory voices in Greek historiography from Herodotus to Appian and by tracing the roots of established views on historical time in the opposition between antiquity and modernity They look both at contemporary scholarly argument and the writings of Greek historians in order to explore the relation of time especially the future to an idea of the historical that is formulated in the plural and is always in motion By reflecting on the prognostic of historical time the volume will be of interest not only to classical scholars but to all who are interested in the history and theory of historical time
