The Gambia And Senegal:

The Gambia-Senegal Border Mariama Khan, 2019-05-22 This book interrogates the validity of longstanding claims that Gambians and Senegalese are one people in two countries and explores how that claim intersects with the politics and development needs of the two countries Half a century after independence proponents of Senegambian unification continue to campaign on the basis of the longstanding social cultural and religious ties between Africa's smallest country The Gambia and Senegal the much larger country which almost entirely encircles it The border between the two former British and French colonies remains one of the starkest examples of colonial geographical bartering and it continues to serve a dual function as a bridge and a barrier in the social political and economic relations of the two countries The book investigates how the two states are constantly pulled between impulses of cooperation and de escalation and a competitive intimacy that disregards kinship ties and re activates tensions In particular the book shows how these interstate dynamics play out across the border itself where indigenous ideas of relatedness are reflected in the cross border transport and trade sectors and in the religious networks that straddle the two countries This book's skilful exploration of intersecting macro level and micro level relations in the Senegambia region will be of interest to scholars of African politics regional studies international development and border studies

Charity Butcher,2019-04-16 Increasingly ethnic and religious variables are taken into account to explain conflict and relations between nations However ethnic and religious groups exist beyond the confines of frontiers In Africa for example hundreds of ethnic groups were divided by colonial borders and many retained kinship connections to their brethren in other countries thus creating cross border ethnic religious affinity Such cross border connections affect a variety of foreign policy from diplomacy to the use of force An internal problem can spread to other states or external actors can become involved in domestic disputes due to such factors Therefore data on cross border connections are essential to measure and assess their actual or potential effects on foreign policy or conflict This unique resource serves both qualitative and quantitative researchers For ease of use it is divided in sections for each region of world with the entries organized by pairs of contiguous countries Each entry for a pair of countries briefly discusses the ethnic and religious groups that are common to both countries and the historical and current connections between these groups The entries are organized based on the Correlates of War country codes which are widely used by researchers and allow for country pairs to be organized geographically within each section to facilitate easy use of the data *Proposed Union of the Gambia and Senegal* ,1962
