Subcellular Fractionation, 1997 *Cytoskeleton: Signalling and Cell Regulation*, 1999-12-16 This book provides descriptions of experimental methods in research on the cytoskeleton and its relationships to signaling and cell regulation Thus it bridges two active and fertile areas of research The focus is directed particularly towards methods which take advantage of recent advances in molecular biology microscopy and immunological assays A second emphasis is on methods for understanding dynamic changes in cells A third emphasis is on the formation and turnover of macromolecular and supramolecular complexes which are so important in driving cell regulation and the behaviour of cytoskeletal elements A combination of practical advice and detailed protocols should make this book valuable for both novice and experienced workers in these burgeoning fields

GTPases Regulating Membrane Dynamics W. E. Balch, Channing J. Der, Alan Hall, 2005-12-13 Provides a comprehensive set of articles describing the use and application of state of the art methodologies to identify and characterize these GTPases and their expanding list of regulators and effectors This work also includes methodologies focused on biochemical molecular and advanced imaging techniques

Protein Structure Prediction : A Practical Approach Michael J. E. Sternberg, 1996-11-28 The three dimensional structure of proteins is a key factor in their biological activity There is an increasing need to be able to predict the structure of a protein once its amino acid sequence is known this book presents practical methods of achieving that ambitious aim using the latest computer modelling algorithms The prediction of the three dimensional structure of a protein from its sequence is a problem faced by an ever increasing number of biological scientists as they strive to utilize genetic information The increasing sizes of the sequence and structural databases the improvements in computing power and the deeper understanding of the principles of protein structure have led to major developments in the field in the last few years This book presents practical computer based methods using the latest computer modelling algorithms

Biological Centrifugation Dr John Graham, 2020-12-17 An important introduction to the use of the centrifuge in the biology laboratory Biological Centrifugation is also useful for more experienced workers The book describes the background and the principles behind centrifugation including sedimentation theory The book also considers the different types of centrifuge and other centrifuge hardware available density gradient

media and gradient technology Although aimed primarily at the novice this title also provides information to allow more experienced workers to modify and update existing techniques

RNA-Protein Interactions : A Practical Approach Christopher W.J. Smith, 1998-07-09 RNA protein interactions play a fundamental role in gene expression and protein synthesis Recent research into the role of RNA in cells has elucidated many more vital interactions with proteins This book provides an up to date and comprehensive guide to a wide range of laboratory procedures to investigate the interactions between RNA and proteins RNA protein interactions play a vital role in gene transcription and protein expression Interactions such as the synthesis of mRNA by RNA polymerases to the essential modification of RNA by the proteins of the spliceosome complex and the highly catalytic action of the ribosome in protein synthesis are established as being fundamental to the function of RNA Recent research into for example the role of RNA as a catalyst has elucidated many more interactions with proteins that are vital to cell function RNA Protein Interactions A Practical Approach provides a clear and comprehensive guide to the experimental procedures used in studying RNA protein interactions The approaches covered range from those initially used to detect a novel RNA protein interaction various biochemical and genetic approaches to purifying and cloning RNA binding proteins through to methods for an in depth analysis of the structural basis of the interaction The volume includes a number of procedures that have not previously been covered in this type of manual These include the production of site specifically modified RNAs by enzymatic and chemical methods and in vivo screening for novel RNA protein interactions in yeast and E coli This is the first volume to gather in one place this wide array of approaches for studying RNA protein interactions As is customary for the Practical Approach series the writing is characterized by a clear explanatory style with many detailed protocols This informative book will be a valuable aid to laboratory workers in biochemistry and molecular biology graduate students postdoctoral and senior scientists whose research encompasses this field
