Subject Thought And Context:

Subject, Thought, and Context Philip Pettit, John McDowell, 1986 Are mental states in the head Or do they intrinsically involve aspects of the subject's physical and social context This volume presents a number of essays dealing with the compass of the mind The contributors broach a range of issues with a common view that physical and social magnets do act upon mental states The approaches that run through these papers make the volume challenging to cognitive psychologists theorists of artificial intelligence social theorists and philosophers

Singular Thought and Mental Files Rachel Goodman, James Genone, Nick Kroll, 2020-02-06 The notion of singular or de re thought has become central in philosophy of mind and language yet there is still little consensus concerning the best way to think about the nature of singular thought Coinciding with recognition of the need for more clarity about the notion there has been a surge of interest in the concept of a mental file as a way to understand what is distinctive about singular thought What isn't always clear however is what mental files are meant to be and why we should believe that thoughts that employ them are singular as opposed to descriptive This volume brings together original chapters by leading scholars which aim to examine and evaluate the viability of the mental files framework for theorizing about singular thought The first section of the volume addresses the central issues of the definition and nature of singular thought as well as how it relates to the notion of a mental file The second section addresses the legitimacy of the mental files conception of singular thought by assessing the philosophical motivations or the purported empirical support for the view or by laying out a specific version of it The third section helps to clarify both the notion of a mental file and the mental files conception of singular thought by focusing on their role in explaining de jure coreference in thought and language The volume then concludes with a final section that casts doubt on the mental files conception and the legitimacy of the file theoretic framework more generally

Mind, Morality, and Explanation Frank Jackson, Philip Pettit, Michael Smith, 2004-02-19 Frank Jackson Philip Pettit and Michael Smith have been at the forefront of philosophy in Australia for much of the last two decades and their collaborative work has had widespread influence throughout the world *Mind Morality and Explanation* collects the best of that work in a single volume showcasing their seminal contributions to philosophical psychology the theory of psychological and social explanation moral theory and moral psychology

Current Issues in Philosophy of Mind Anthony O'Hear, 1998 Contemporary Issues in Philosophy of Mind brings together leading figures in the area from Britain and the US who lay out their thoughts on key issues in an accessible way

Representational Content and the Objects of Thought Nicholas Rimell, 2021-09-30 This book defends a novel view of mental representation of how as thinkers we represent the world as being The book serves as a response to two problems in the philosophy of mind One is the problem of first personal or egocentric belief how can we have truly first personal beliefs beliefs in which we think about ourselves as ourselves given that beliefs are supposed to be attitudes towards propositions and that propositions are supposed to have their truth values independent of a perspective The other

problem is how we can think about nonexistents e.g. Santa Claus given the widespread view that thought essentially involves a relation between a thinker and whatever is being thought about. The standard responses to this puzzle are either to deny that thought is essentially relational or to insist that it is possible to stand in relations to nonexistents. This book offers an error theory to the problem. The responses from this book arise from the same commitment: a commitment to treating talk of propositions as the things towards which our beliefs are attitudes, as talk of entities that actually exist and that play a constitutive and explanatory role in the activity of thought.

The Philosophy of David Kaplan Joseph Almog, Paolo Leonardi, 2009-03-17. This volume collects new previously unpublished articles on the philosopher David Kaplan. Kaplan's intellectual influence on 20th century analytic philosophy has been substantial. Beyond his highly influential work in the philosophy of language and philosophical logic, Kaplan is just as important in his way of doing philosophy: generous, witty, incisive and interactive.

Perspectival Thought François Recanati, 2007-09-27. Recanati examines the nature of thought and understanding and defends the idea that truth is relative to context. The book will be of interest to those working in philosophy of language and linguistics as well as philosophers of mind, epistemologists and psychologists and cognitive scientists.

Embodied Selves and Divided Minds Michelle Maiese, 2016. Embodied Selves and Divided Minds examines how research in embodied cognition and enactivism can contribute to our understanding of the nature of self-consciousness, the metaphysics of personal identity and the disruptions to self-awareness that occur in cases of psychopathology. It begins with the assumption that if we take embodiment seriously then the resulting conception of the self as physically grounded in the living body can help us to make sense of how a minded subject persists across time. However, rather than relying solely on puzzle cases to discuss diachronic persistence and the sense of self, this work looks to schizophrenia and dissociative identity disorder as case studies. Here we find real-life examples of anomalous phenomena that signify disruptions to embodied self-experience and appear to indicate a fragmentation of the self. However, rather than concluding that these disorders count as genuine instances of multiplicity, the book's discussion of the self and personal identity allows us to understand the characteristic symptoms of these disorders as significant disruptions to self-consciousness. The concluding chapter then examines the implications of this theoretical framework for the clinical treatment of schizophrenia and dissociative identity disorder. Embodied Selves and Divided Minds reveals how a critical dialogue between Philosophy and Psychiatry can lead to a better understanding of important issues surrounding self-consciousness, personal identity and psychopathology.

Naturalism in Question Mario De Caro, David Macarthur, 2004-05-31. Today most philosophers in the English-speaking world adhere to naturalist credos that philosophy is continuous with science and that the natural sciences provide a complete account of all that exists. This volume presents a group of leading thinkers who criticize scientific naturalism in order to defend a more inclusive or liberal naturalism.

Context and the Attitudes Mark Richard, 2013-03-07. Context and the Attitudes collects thirteen seminal essays by Mark Richard on semantics and propositional attitudes. These essays develop a

nuanced account of the semantics and pragmatics of our talk about such attitudes an account on which in saying what someone thinks we offer our words as a translation or representation of the way the target of our talk represents the world A broad range of topics in philosophical semantics and the philosophy of mind are discussed in detail including contextual sensitivity pretense and semantics negative existentials fictional discourse the nature of quantification the role of Fregean sense in semantics direct reference semantics de re belief and the contingent a priori belief de se intensional transitives the cognitive role of tense and the prospects for giving a semantics for the attitudes without recourse to properties or possible worlds Richard's extensive newly written introduction gives an overview of the essays The introduction also discusses attitudes realized by dispositions and other non linguistic cognitive structures as well as the debate between those who think that mental and linguistic content is structured like the sentences that express it and those who see content as essentially unstructured
