Las pantallas y el cerebro emocional Joan Ferrés i Prats, 2014-01-01 En nuestros días la era de las nuevas tecnologías y la era del cerebro se dan la mano El cerebro emocional es el eje en torno al que pivota la actividad mental según nos revelan las últimas investigaciones De este modo en un mundo en el que la mayor parte de las comunicaciones son mediadas por pantallas sólo se puede garantizar la formación integral de las personas si se les proporciona una competencia mediática que atienda a los procesos mentales de carácter emocional e inconsciente En la era del prosumidor no podemos ser competentes en la producción de mensajes y en la interacción con mensajes ajenos sin la gestión de las emociones en sus dimensiones movilizadora y cognitiva Y en la era del cerebro no se puede comprender la razón y la conciencia sin entender los mecanismos emocionales e inconscientes que subyacen a ellas Este libro es un estudio provocativo e innovador que pone en entredicho algunos de los parámetros tradicionales de la educación mediática Joan Ferrés nos introduce en una reflexión apasionante sobre la influencia del cerebro emocional Como nos advierte la interacción crítica con el nuevo entorno social la construcción colaborativa de conocimientos y la potenciación de la creatividad sólo serían posibles desde la capacidad para reflexionar y gestionar nuestras emociones
