Subsidizing Industrial Location A Conceptual Framework With Application To Korea:

Subsidizing Industrial Location Michael P. Murray, 1988 How can policymakers in developing countries best induce firms to locate at particular sites To glean answers to this question the author develops the first rigorous conceptual framework for analyzing the economic efficiency of alternative policies to influence firms choices of location The framework is rooted in a theory of optimal subsidies and relies on econometric and simulation models of firms costs The econometric model is estimated with data from a census of manufacturing and from a recent comprehensive World Bank study of industrial location policies both made in the Republic of Korea These estimates serve as the basis for a simulation model that is used to examine the various subsidies that constitute location policies The simulation model is used with the Korean data to analyze these subsidies which include loan guarantees reductions in land prices public investments such as better roads and tax breaks The simulations allow the author to evaluate the benefits and costs of the subsidies and to discuss their relative efficiencies

Contemporary Argentina David J Keeling, 2021-11-28 In this perceptive book David Keeling analyzes Argentinas changing position in the modern world economy against the backdrop of the countrys regional development processes Combining systematic and area based approaches he discusses international and national trends that have shaped the social and economic geography of Argentina in profound and fundamental ways Drawing on recent census data as well as on material from the Menem government Keeling also explores whether Argentinas participation in the new world government has adversely affected environmental labor and social conditions Since 1989 Argentina has experienced perhaps its most significant period of change since federation in 1880 Under the leadership of Carlos Menem and the Justicialista political party contemporary Argentina is emerging from the chaos of long term instability to reassert itself as a viable player in both regional and global systems **The American Economic Review**, 1988 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association

Korean Economic Development Jene Kwon, 1990-08-28 Over the past three decades South Korea s economic performance has bordered on a miracle Few economies have achieved such spectacular growth in such a short period of time Korea s development process provides a sharp contrast to the lackluster growth experienced by many other developing economies and represents several unique characteristics even in comparison with its neighbors Japan and Taiwan At the same time certain aspects of its development remain minor mysteries requiring further examination and scrutiny At the very least the meteoric rise of a small economy and its people to international prominence after centuries of obscurity disenfranchisement and privation deserves careful investigation and worldwide attention This collection of 24 original essays focuses on the

economic policies that led to the rapid transformation of the Korean economy Among the salient features of the Korean experience dealt with by the contributors are development policies and the record of development export policies exchange rate import liberalization factor price distortions and changing comparative advantage production technology and total factor productivity macroeconomic perspectives conglomeration business concentration and management practices income distribution and labor issues and urban and regional policies Throughout the book the role of the government in the development process and the dominance of large businesses in the economic sphere are analyzed extensively In seeking to trace the relationships among various economic factors and to provide some insight into the process of economic development this volume marshalls a considerable array of statistics and institutional descriptions as a background for analysis This book will be welcomed by those studying economic development in general and the East Asian economy in particular as well as by those currently engaged in dealing with Korea **The Korean Crisis** □□,2000 Materials on Asia, accession list and review ,1992
