Suburban America 1945-1970 Drawings Of Buildings And Automobiles Which Changed The Appearance Of American Suburbs:

Suburban America 1945-1970 Frederic Alan Sharf, 2002 **A Model for Identifying and Evaluating the Historic Significance of Post-World War II Housing**, 2012 The report which contains numerous illustrations and photographic examples of postwar housing will also serve as an important reference document for cultural preservation professionals Vast numbers of postwar houses located in every American city town suburb and rural area are either currently more than 50 years old or will soon become 50 years old and are thus potentially eligible for listing in the National Register of Historic Places National Register Because of the passage of time the number of potentially eligible houses will increase dramatically in the next decade presenting a major challenge to DOT decision makers and preservation planners *Crabgrass Frontier* Kenneth T. Jackson, 1987-04-16 This first full scale history of the development of the American suburb examines how the good life in America came to be equated with the a home of one s own surrounded by a grassy yard and located far from the urban workplace Integrating social history with economic and architectural analysis and taking into account such factors as the availability of cheap land inexpensive building methods and rapid transportation Kenneth Jackson chronicles the phenomenal growth of the American suburb from the middle of the 19th century to the present day He treats communities in every section of the U S and compares American residential patterns with those of Japan and Europe In conclusion Jackson offers a controversial prediction that the future of residential deconcentration will be very different from its past in both the U S and Europe **Suburban America 1930-1970** Frederic Alan Sharf, 2001 **Borderland** John R. Stilgoe, 1988-01-01 This text portrays the American suburbs from their beginnings in the mid 1800s to the onset of World War II and focuses on their appearance people s reaction to them and their importance to society Building Suburbia Dolores Hayden, 2003 For almost two centuries Americans have been moving to the suburbs in search of affordable family housing unspoiled nature and small town sociability only to find that their leafy new neighborhoods are part of the growing metropolitan sprawl It is to this contested cultural landscape where most Americans now live that Dolores Hayden draws our attention From nineteenth century utopian communities and elite picturesque enclaves to early twentieth century streetcar subdivisions and owner built tracts to the vast postwar sitcom suburbs and the subsidized malls and office parks that followed on a scale that earlier builders could never have imagined Hayden reveals the cultural and economic patterns that have brought us to the present She explores the interplay of natural and built environments the complex antagonisms between real estate developers and suburban residents the hidden role of federal government and the religious and ideological overtones of the American dream embedded in the suburbs Hayden asks hard questions about who has benefited from the suburban building process and about smart growth and green building And she makes a strong case for the revitalization of existing neighborhoods in place of unchecked new growth on rural fringes Few readers will see our ubiquitous suburbs in the same way again *American*

Automobile Art, 1945-1970 Frederic Alan Sharf, 2007 **The Anglo American Suburb** Robert A. M. Stern, John Montague Massengale, 1981 **Manufacturing Suburbs** Robert D. Lewis, 2004 Urban historians have long portrayed suburbanization as the result of a bourgeois exodus from the city coupled with the introduction of streetcars that enabled the middle class to leave the city for the more sylvan surrounding regions Demonstrating that this is only a partial version of urban history Manufacturing Suburbs reclaims the history of working class suburbs by examining the development of industrial suburbs in the United States and Canada between 1850 and 1950 Contributors demonstrate that these suburbs developed in large part because of the location of manufacturing beyond city limits and the subsequent building of housing for the workers who labored within those factories Through case studies of industrial suburbanization and industrial suburbs in several metropolitan areas Chicago Baltimore Detroit Pittsburgh Los Angeles San Francisco Toronto and Montreal Manufacturing Suburbs sheds light on a key phenomenon of metropolitan development before the Second World War **Working-Class Suburb** Bennett M. Berger, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1960
