Suburban Wilderness:

Canadian Suburban Cheryl Cowdy, 2022-04-15 Though a large proportion of Canadians live in suburban communities the Canadian cultural imaginary is filled with other landscapes The wilderness the prairie cityscapes and small towns are the settings by which we define our nation rather than the strip mall the single family home and the developing subdivision which for many are ubiquitous features of everyday life Canadian Suburban considers the cultures of suburbia as they are articulated in English Canadian fiction published from the 1960s to the present Cheryl Cowdy begins her excursion through novels set between 1945 and 1970 the heyday of modern suburban development with works by canonical authors such as Margaret Laurence Richard B Wright Margaret Atwood and Barbara Gowdy Her investigation then turns to the meaning of the suburbs within fiction set after the 1970s when a more corporate model of suburbanization prevailed and ends with an investigation of how writers from immigrant and racialized communities are radically transforming the suburban imaginary Cowdy argues there is no one authentic suburban imaginary but multiple at times contradictory representations that disrupt prevalent assumptions about suburban homogeneity Canadian Suburban provides a foundation for understanding the literary history of suburbia and a refreshing reassessment of the role of space and place in Canadian culture and identity *Writing Environments* Sidney I. Dobrin, Christopher J. Keller, 2012-02-01 Writing Environments addresses the intersections between writing and nature through interviews with some of America's leading environmental writers Those interviewed include Rick Bass Cheryll Glotfelty Annette Kolodny Max Oelschlaeger Simon J Ortiz David Quammen Janisse Ray Scott Russell Sanders Edward O Wilson and Ann H Zwinger From the standpoints of activists scientists naturalists teachers and highly visible writers the interviewees consider how different environments have influenced them how their writing affects environments and the ways readers experience environments The interviews are followed by critical responses from writing scholars This diverse range of voices speaks lucidly and captivantly about topics such as place writing teaching politics race and culture and how these overlap in many complex ways **Nature , Monstrous Spaces: The Other Frontier** , 2019-01-04 This volume was first published by Inter Disciplinary Press in 2013 Monstrous Spaces The Other Frontier is a collection of essays presented during the First Global Conference of Monstrous Geography held at Manchester College Oxford When examining monstrous geographies we encounter an Other frontier a space that runs counter to the socially constructed space of culture that at the same time includes overlaps and co occupies the cultural landscape **So That Others May Serve** Mike McKenna, 2025-02-01 When disaster strikes whether under the stars of a remote wilderness or amidst the chaos of an urban catastrophe search and rescue SAR responders answer the call not for fame but for purpose Their mission do the most good for the most people as swiftly and safely as possible In So That Others May Serve veteran SAR professional and instructor Mike McKenna distills more than two decades of field experience into an engaging insightful guide for responders leaders and those driven to serve Drawing from gripping real life missions and hard earned lessons this book offers a front row seat

Success in the Suburbs John Robert McMahon,1917 *The Nature of Being Human* Harold Fromm,2009-05-04 Although the physical relationship between the natural world and individuals is quantifiable the psychosocial effect of the former on the latter is often less tangible What for instance is the connection between the environment in which we live and our creativity How is our consciousness bounded and delimited by our materiality And from whence does our idea of self and our belief in free will derive and when do our surroundings challenge these basic assumptions Ecocritic Harold Fromm s challenging exploration of these and related questions twines his own physical experiences and observations with insights gathered from both the humanities and the sciences Writing broadly and personally Fromm explores our views of nature and how we write about it He ties together ecology evolutionary psychology and consciousness studies to show that our perceived separation from our surroundings is an illusory construct He argues for a naturalistic vision of creativity free will and the literary arts unimpeded by common academic and professional restraints At each point of this intellectual journey Fromm is honest engaging and unsparing Philosophical critical often personal Fromm s sweeping interdisciplinary and sometimes combative essays will change the way you think about your place in the environment

Colorado Powder Keg Michael W. Childers, 2016-05-23 Downhill skiing is a vital economic engine for many communities in the Rocky Mountain states attracting 20 million skier days per season Colorado is by far the most popular destination with more than two dozen major ski resorts creating a thriving industry that adds billions to the state's coffers But many ask at what cost Michael Childers traces the rise of Colorado's ski industry alongside that of the burgeoning environmental movement which sprang up in opposition to rampant commercial development on mountains that had been designated as public lands Combining official ski resort figures U S Forest Service documents real estate and tourism records wildlife data newspaper articles and public comments Childers shows how what started as an innocent leisurely pursuit has morphed into a multi billion dollar business that forever changed the landscape of Colorado and brought with it serious environmental consequences This first environmental history of skiing in Colorado traces the recreation's rise in popularity as a way of examining major changes in public land management in the American West during the last century As more people headed to Colorado's mountains in search of thrills on the slopes the USFS quickly became overwhelmed by the demand and turned resort development over to the private sector The result has been a decades long battle between developers and environmentalists with skiers and Colorado residents caught in the middle Childers examines the history of the ski industry within Colorado throughout the twentieth century along with the challenges the industry's growth posed in balancing the private development of public lands and mounting environmental concerns over issues such as rural growth wildlife management and air and water pollution He then traces the history of radical environmentalism back to the 1960s to show how it picked up momentum culminating in the Earth Liberation Front's 1998 arson at Vail Ski Resort which ended up doing more harm than good to the environmentalist cause by recasting the mega resorts as victims and turning public opinion against all environmental activists in the area As Americans weigh their desire for fresh powder against their concern for protecting unspoiled lands Childers's book provides valuable food for thought Colorado Powder Keg opens a new window on the history of skiing in the American West as it adds to the broader debate over the management and purpose of national forests
