Slave Path II:

Slave Path II Francine Whittaker, 2004-07-01 **DCIS2002** Salvador Bracho del Pino, Mar Martínez, Teresa Riesgo, Miguel Ángel Allende Recio, 2002 Este libro contiene las presentaciones de la XVII Conferencia de Diseño de Circuitos y Sistemas Integrados celebrado en el Palacio de la Magdalena Santander en noviembre de 2002 Esta Conferencia ha alcanzado un alto nivel de calidad como consecuencia de su tradición y madurez que lo convierte en uno de los acontecimientos más importantes para los circuitos de microelectrónica y la comunidad de diseño de sistemas en el sur de Europa Desde su origen tiene una gran contribución de Universidades españolas aunque hoy los autores participan desde catorce países *Numerical Methods in Contact Mechanics* Vladislav A. Yastrebov, 2013-02-13 Computational contact mechanics is a broad topic which brings together algorithmic geometrical optimization and numerical aspects for a robust fast and accurate treatment of contact problems This book covers all the basic ingredients of contact and computational contact mechanics from efficient contact detection algorithms and classical optimization methods to new developments in contact kinematics and resolution schemes for both sequential and parallel computer architectures The book is self contained and intended for people working on the implementation and improvement of contact algorithms in a finite element software Using a new tensor algebra the authors introduce some original notions in contact kinematics and extend the classical formulation of contact elements Some classical and new resolution methods for contact problems and associated ready to implement expressions are provided *Practical Industrial Data Networks* Steve Mackay, 2004-04-19 There are many data communications titles covering design installation etc but almost none that specifically focus on industrial networks which are an essential part of the day to day work of industrial control systems engineers and the main focus of an increasingly large group of network specialists The focus of this book makes it uniquely relevant to control engineers and network designers working in this area The industrial application of networking is explored in terms of design installation and troubleshooting building the skills required to identify prevent and fix common industrial data communications problems both at the design stage and in the maintenance phase The focus of this book is outside the box The emphasis goes beyond typical communications issues and theory to provide the necessary toolkit of knowledge to solve industrial communications problems covering RS 232 RS 485 Modbus Fieldbus DeviceNet Ethernet and TCP IP The idea of the book is that in reading it you should be able to walk onto your plant or facility and troubleshoot and fix communications problems as quickly as possible This book is the only title that addresses the nuts and bolts issues involved in design installation and troubleshooting that are the day to day concern of engineers and network specialists working in industry Provides a unique focus on the industrial application of data networks Emphasis goes beyond typical communications issues and theory to provide the necessary toolkit of knowledge to solve industrial communications problems Provides the tools to allow engineers in various plants or facilities to troubleshoot and fix communications problems as quickly as possible **Women and Migration(s) II**

Kalia Brooks, Cheryl Finley, Ellyn Toscano, Deborah Willis, 2022-11-14 *Women and Migration s II* draws together contributions from scholars and artists showcasing the breadth of intersectional experiences of migration from diaspora to internal displacement Building on conversations initiated in *Women and Migration Responses in Art and History* this edited volume features a range of written styles from memoir to artists statements to journalistic and critical essays The collection shows how women s experiences of migration have been articulated through art film poetry and even food This varied approach aims to aid understanding of the lived experiences of home loss family belonging isolation borders and identity issues salient both in experiences of migration and in the epochal times in which we find ourselves today These are stories of trauma and fear but also stories of the strength perseverance hope and even joy of women surviving their own moments of disorientation disenfranchisement and dislocation This collection engages with current issues in an effort to deepen understanding encourage ongoing reflection and build a more just future It will appeal to artists and scholars of the humanities social sciences and public policy as well as general readers with an interest in women s experiences of migration

Sidebotham, 2011-02-02 The legendary overland silk road was not the only way to reach Asia for ancient travelers from the Mediterranean During the Roman Empire s heyday equally important maritime routes reached from the Egyptian Red Sea across the Indian Ocean The ancient city of Berenike located approximately 500 miles south of today s Suez Canal was a significant port among these conduits In this book Steven E Sidebotham the archaeologist who excavated Berenike uncovers the role the city played in the regional local and global economies during the eight centuries of its existence Sidebotham analyzes many of the artifacts botanical and faunal remains and hundreds of the texts he and his team found in excavations providing a profoundly intimate glimpse of the people who lived worked and died in this emporium between the classical Mediterranean world and Asia

Paths to Freedom Rosemary Brana-Shute, Randy J. Sparks, 2021-03-03 An international comparative study of a mode of emancipation that worked to reinforce the institution of slavery Manumission the act of freeing a slave while the institution of slavery continues has received relatively little scholarly attention as compared to other aspects of slavery and emancipation To address this gap editors Rosemary Brana Shute and Randy J Sparks present a volume of essays that comprise the first ever comparative study of manumission as it affected slave systems on both sides of the Atlantic In this landmark volume an international group of scholars consider the history and implications of manumission from the medieval period to the late nineteenth century as the phenomenon manifested itself in the Old World and the New The contributors demonstrate that although the means of manumission varied greatly across the Atlantic world in every instance the act served to reinforce the sovereign power structures inherent in the institution of

slavery In some societies only a master had the authority to manumit slaves while in others the state might grant freedom or it might be purchased Regardless of the source of manumission the result was viewed by its society as a benevolent act intended to bind the freed slave to his or her former master through gratitude if no longer through direct ownership The possibility of manumission worked to inspire faithful servitude among slaves while simultaneously solidifying the legitimacy of their ownership The essayists compare the legacy of manumission in medieval Europe the Jewish communities of Levant Europe and the New World the Dutch French and British colonies and the antebellum United States while exploring wider patterns that extended beyond a single location or era They also document the fates of manumitted slaves some of whom were accepted into freed segments of their societies while others were expected to vacate their former communities entirely The contributors investigate the cultural consequences of manumission as well as the changing economic conditions that limited the practice by the eighteenth century to understand better the social implications of this multifaceted aspect of the system of slavery
