Mapping the Darkness Kenneth Miller,2023-10-03 WINNER OF THE 2024 ASJA BOOK AWARD BIOGRAPHY HISTORY NAMED A BEST BOOK OF THE YEAR 2023 BY THE NEW YORKER NEW YORK TIMES EDITOR S CHOICE SELECTION From award winning journalist Kenneth Miller comes the definitive story of the scientists who set out to answer two questions Why do we sleep and How can we sleep better A century ago sleep was considered a state of nothingness even a primitive habit that we could learn to overcome Then an immigrant scientist and his assistant spent a month in the depths of a Kentucky cave making nationwide headlines and thrusting sleep science to the forefront of our consciousness In the 1920s Nathaniel Kleitman founded the

world's first dedicated sleep lab at the University of Chicago where he subjected research participants including himself to a dizzying array of tests and tortures. But the tipping point came in 1938 when his cave experiment awakened the general public to the unknown and vital world of sleep. Kleitman went on to mentor the talented but troubled Eugene Aserinsky whose discovery of REM sleep revealed the astonishing activity of the dreaming brain and William Dement a jazz bass playing revolutionary who became known as the father of sleep medicine. Dement in turn mentored the brilliant maverick Mary Carskadon who uncovered an epidemic of sleep deprivation among teenagers and launched a global movement to fight it. Award winning journalist Kenneth Miller weaves together science and history to tell the story of four outsider scientists who took sleep science from fringe discipline to mainstream obsession through spectacular experiments, technological innovation and single minded commitment. Readers will walk away with a comprehensive understanding of sleep and why it affects so much of our lives. A propulsive utterly engrossing history. None of it is simple and all of it is captivating. The New York Times Mapping the Darkness offers two narratives at once a sweeping journey of discovery about dreams sleep and the terra incognita of unconsciousness and a wake up call about the dangers of chronic exhaustion. It's time Mr Miller tells us to take our sleep back. The Wall Street Journal

Sleepiness and Human Impact Assessment Sergio Garbarino, Lino Nobili, Giovanni Costa, 2014-04-08 The World Health Organization supports tools and initiatives in Health Impact Assessment to dynamically improve health and well being across different sectors. Human Impact Assessment (HuIA) is a relatively new concept. It describes an integrated process that encompasses both Health Impact Assessment and Social Impact Assessment and is used to anticipate the effects of programs, projects and decisions on human health and welfare. Sleep occupies approximately one third of our lives but its human impact remains largely unrecognized. The prevalence of excessive sleepiness is recognized to be increasing in industrialized societies. Without doubt sleepiness and fatigue have high costs in terms of both lives lost and socioeconomic impact. For example the National Highway Traffic Safety Administration estimates that up to 4% of all fatal crashes are caused by drowsy drivers and that as many as 100 000 deaths per year in the United States may be due to fatigue related medical errors. Sleepiness and Human Impact Assessment provides a uniquely comprehensive exploration of many different facets of sleepiness in our 24 hour society from the new HuIA point of view. Among the covered issues are the physiology and pathophysiology of sleep its relationship to daytime alertness fatigue and drugs the relevance of sleep related fatigue in various occupational settings and public safety. This book will be of assistance to physicians occupational health professionals ergonomists researchers and decision makers as they strive to understand the full significance of sleepiness and to create a culture of accountability in everyday life without sleep related risks.

disturbance inherent to psychiatric illness and primary sleep disorders as well as the psychopharmacologic and behavioral treatments available. *Foundations of Psychiatric Sleep Medicine* provides a uniquely accessible practical and expert summary of current clinical concepts at the sleep psychiatry interface. Williams, 2011-03-29 Why has sleep become increasingly politicized in contemporary society? This book provides an account of the politics of sleep in the late modern age. The future of sleep has become contested and uncertain: something to be defended, downsized, or even perhaps one day done away with altogether. *Modern General Psychology, Second Edition (revised And Expanded) (in 2 Vols.)* M. Brent Willock, 2018-05-08 Just when the world thought Oscar Pistorius' meteoric rise to Olympic glory and international celebrity had terminated abysmally in prison, Brent Willock's scientific perspective reopens this gripping narrative for an astonishing re-view. Olympian Oscar Pistorius' spectacular ascent to fame ground to a screeching halt in the wee hours of Valentine's Day 2013. Hearing a sound emanating from his bathroom, he grabbed his pistol and he stumbled to the washroom screaming at the intruders to leave. Fearing someone was about to emerge to harm him and his girlfriend Reeva, he fired four bullets into the bathroom. Soon he realized he had killed his lover. Horrified, he summoned the authorities. The investigating detective believed this was yet another case of an escalating argument where a man murdered his partner. World opinion is split. Some believe Oscar. Others are convinced he committed a despicable crime of passion. Distinguished clinical psychologist Brent Willock brings an entirely new perspective to bear on these horrific events that Oscar's horrific actions occurred while he was in a state of paradoxical sleep, also known as parasomnia. Throughout this book, Willock uses scientific scrutiny and legal precedence to resolve the crucial anomalies surrounding the Oscar Pistorius trial. Willock also discusses how mental health experts and the defense team might have overlooked the hypothesis of parasomnia that could have exonerated Oscar. Millions who followed the Blade Runner's astonishing achievements, uplifted and inspired by his triumph

over physical adversity were crushed by his precipitous plunge from grace They were baffled Even Oscar himself in a television interview shortly before his sentencing achingly asked I always think How did this possibly happen How could this have happened At last Willock s elegant work responds to these poignant questions that have so plagued and pained Reeva s family friends Oscar and indeed the world

The Harvard List of Books in Psychology Harvard University,1971 The Harvard List of Books in Psychology was first compiled in the 1930s when each student in the department enjoyed the luxury of an individual tutorial Together tutor and student could map out a course of reading By 1938 the list had proved so useful that its 349 titles were annotated and printed though mainly for local consumption Growth of an outside demand from students librarians and the reading public led to a supplement in 1944 and a number of successive editions bearing the present title The present edition updates the List without expanding it beyond useful size for each new title the compilers have faithfully tried to delete one and new entries account for almost half of the present total of 744 Each title is annotated with descriptive and evaluative material
