Style in Pottery Armur Lane,1974 **Style in Pottery** Arthur Lane,1948 **Coexistence and Cultural Transmission in East Asia** Naoko Matsumoto,Hidetaka Bessho,Makoto Tomii,2016-06-03 This is the first volume to introduce the data theory and methodology of contemporary archaeological work in Japan and other parts of East Asia archaeology in English to western audiences It also introduces a new theoretical concept to archaeologists interested in the relationship between ancient cultures coexistence Archaeologists traditionally examine the boundaries between different cultural groups in terms conflict and dominance rather than long term harmonious adaptive responses Chapters in this book cover evidence from burials faunal and botanical analysis as well as traditional trade goods It is of interest to archaeologists conducting research in East Asia or studying intercultural interaction anywhere around the globe **To Be Like Gods** Matthew G. Looper,2010-01-01 Winner Association for Latin American Art Book Award 2010 The Maya of Mexico and Central America have performed ritual dances for more than two millennia Dance is still an essential component of religious experience today serving as a medium for communication with the supernatural During the Late Classic period AD 600 900 dance assumed additional importance in Maya royal courts through an association with feasting and gift exchange These performances allowed rulers to forge political alliances and demonstrate their control of trade in luxury goods The aesthetic values embodied in these performances were closely tied to Maya social structure expressing notions of gender rank and status Dance was thus not simply entertainment but was fundamental to ancient Maya notions of social religious and political identity Using an innovative interdisciplinary approach Matthew Looper examines several types of data relevant to ancient Maya dance including hieroglyphic texts pictorial images in diverse media and architecture A series of case studies illustrates the application of various analytical methodologies and offers interpretations of the form meaning and social significance of dance performance Although the nuances of movement in Maya dances are impossible to recover Looper demonstrates that a wealth of other data survives which allows a detailed consideration of many aspects of performance To Be Like Gods thus provides the first comprehensive interpretation of the role of dance in ancient Maya society and also serves as a model for comparative research in the archaeology of performance **Kleronomia** Jerolyn E. Morrison,Joanne M. A. Murphy,2022-12-31 The 27 papers in this volume harken to the themes that Jeffrey Soles has influenced during his illustrious career in Aegean Bronze Age archaeology ancestry burial customs religion trade jewelry the development of the Minoan settlement of Mochlos in eastern Crete and the rise and fall of the Minoan civilization *California Studies* ,1970

Style, Society, and Person Christopher Carr, Jill E. Neitzel, 2013-11-11 Style Society and Person integrates the diverse current and past understandings of the causes of style in material culture It comprehensively surveys the many factors that cause style reviews theories that address these factors builds and tests a unifying framework for integrating the theories and illustrates the framework with detailed analyses of archaeological and ethnographic data ranging from simple to complex societies Archaeologists sociocultural anthropologists and educators will appreciate the unique unifying approach this book takes to developing style theory

Economic Analyses of Prehistoric Greece Donald Jones, 2023-08-09 This collection of essays uses economic theory to investigate important problems in Greek archaeology covering the Neolithic Age through the Late Bronze Age and into the Early Iron Age Topics explored include the erosion of egalitarianism between the Neolithic and the Late Bronze Age the early urbanization of Minoan Crete possible survivors of the volcanic destruction of Santorini Bronze Age Aegean shipping the post Mycenaean Greek population collapse and subsequent migrations and the Sea Peoples and piracy

Biblical Peoples and Ethnicity Ann E. Killebrew, 2012-09-01 Ancient Israel did not emerge within a vacuum but rather came to exist alongside various peoples including Canaanites Egyptians and Philistines Indeed Israel's very proximity to these groups has made it difficult until now to distinguish the archaeological traces of early Israel and other contemporary groups Through an analysis of the results from recent excavations in light of relevant historical and later biblical texts this book proposes that it is possible to identify these peoples and trace culturally or ethnically defined boundaries in the archaeological record Features of late second millennium B C E culture are critically examined in their historical and biblical contexts in order to define the complex social boundaries of the early Iron Age and reconstruct the diverse material world of these four peoples Of particular value to scholars archaeologists and historians this volume will also be a standard reference and resource for students and other readers interested in the emergence of early Israel

Regional Archaeology in the Inca Heartland R. Alan Covey, 2014-01-01 The Cuzco region of highland Peru was the heartland of the Inca empire the largest native state to develop in the Americas Archaeologists have studied Inca monumental architecture for more than a century but it is only in recent decades that regional survey work has systematically sought to reconstruct patterns of settlement subsistence and social organization in the region This monograph presents the results of regional surveys conducted from 2000 to 2008 to the north and west of the city of Cuzco a region of approximately 1200 square kilometers that was investigated using the same field methodology as other systematic surveys in the Cuzco region The study region referred to as Hanan Cuzco in this volume encompasses considerable environmental

variations ranging from warm valley bottom lands to snow capped mountains The chapters in this volume present settlement pattern data from all periods of pre Columbian occupation from the arrival of the first hunter gatherers to the transformation of valley bottom fields by the last Inca emperors A chapter on the colonial period discusses how Spanish colonial practices transformed an imperial landscape into a peripheral one Together the chapters in this volume contribute to the

archaeological understanding of several central issues in Andean prehistory **Continuity and Change in the Native American Village** Robert A. Cook, 2017-11-02 Two common questions asked in archaeological investigations are where did a

particular culture come from and which living cultures is it related to In this book Robert A Cook brings a theoretically and methodologically holistic perspective to his study on the origins and continuity of Native American villages in the North American Midcontinent He shows that to affiliate archaeological remains with descendant communities fully we need to unaffiliate some of our well established archaeological constructs Cook demonstrates how and why Native American villages formed and responded to events such as migration environment and agricultural developments He focuses on the big picture of cultural relatedness over broad regions and the amount of social detail that can be gleaned from archaeological and biological data as well as oral histories **Pikillacta** Gordon F. McEwan, 2009-05 The origin of the first Andean imperial

state has been the subject of lively debate for decades Archaeological sites dating to the Peruvian Middle Horizon time period A D 540 to 900 appear to give evidence for the emergence of an expansive empire that set the stage for the development of the later Inca state This archaeological investigation of Pikillacta the largest provincial site of Peru s pre Inca Wari empire provides essential background for interpreting the empire s political and cultural organization With engineering skills rivaling those of the builders of Cuzco itself the Wari at Pikillacta erected more than seven hundred buildings covering nearly two square kilometers with a fresh water supply and an elaborate underground sewage system but enigmatically only seven short streets and a near total lack of windows In this long awaited volume Gordon McEwan and his colleagues report on the labor costs of construction nearly 6 million man days the typology of Pikillacta s enigmatic architecture and the site s spectacular hydraulic system as well as its ceramics and chronology human remains and metal artifacts In the final section building on his years of research and excavation McEwan develops a hypothetical model of Wari provincial administration in the Cuzco region arguing that the Wari were innovators of techniques of statecraft that explain the function of and the labor investment in the Pikillacta complex His book not only substantively contributes to our understanding of when and exactly how and why Pikillacta was built and what it was used for it also illuminates the political and cultural antecedents of the Inca state **Eight Human Skulls in a Dung Heap and More** Annet Nieuwhof, 2015-06-30 The study of ritual practice in the

past is an accepted part of archaeological research these days Yet its theoretical basis is still not fully mature This book aims at making a contribution to the study of ritual practice in the past by assembling a theoretical framework which is tailored to the needs of archaeology and which helps to identify and interpret the remains of rituals in the past This framework is

applied in a special archaeological region the coastal area of the northern Netherlands a former salt marsh area In the past people lived here on artificial dwelling mounds so called terps Preservation conditions are excellent in this wetland area This study makes use of the well preserved remains of rituals in terps to examine the role of ritual practice in the societies of the pre Roman and Roman Iron Age in this area

Archaeological Research on Cultures in Northeast China from the Xia to the Warring States Period Binfu Zhao,2025-09-01 This open access book mainly focuses on Northeast China which historically included Heilongjiang Province Jilin Province Liaoning Province and the eastern part of Inner Mongolia Autonomous Region This area borders Mongolia to the west the ocean to the south the Korean Peninsula to the east by the Yalu River and the Tumen River and Russia to the north by the Heilongjiang River and Ussuri River In Northeast China the period from the Xia to the Warring States was an important cultural stage between the Neolithic Age and the Qin Han and Wei dynasties Since 1921 a wealth of archaeological data of this period has been gained through investigations and excavations by scholars from China and abroad This treasure trove of data covers a considerable timespan and broad geographic area Accordingly it is necessary to conduct a comprehensive analysis to distill valuable archaeological insights from materials unearthed throughout the Northeast This book breaks down the chronological coordinates of archaeological cultures during the Xia and Warring States period into seven natural geographic regions namely the Nenjiang River basin in the Northeast the mountainous area of Liaoxi the Liaoxi Plain southern Liaodong northern Liaodong the Second Songhua River basin and the Tumen River basin Further it pursues a multi dimensional approach grouping individual sites and cemeteries categorizing multiple sites and cemetery groups and identifying the period division and chronological sequence of the archaeological cultures Based on a comparison and integrated studies of these seven coordinates we identify four archaeological periods the Xia Shang period the late Shang period the Western Zhou to Spring and Autumn period and the Warring States period
