Stylearchitecture And Buildingart Transformations Of Architecture In The Nineteenth Century And Its Present Condition:

Style-Architecture and Building-Art Hermann Muthesius, 1994-12-15 *Style Architecture and Building Art* is Hermann Muthesius's classic criticism of nineteenth century architecture. Now published for the first time in English, this pivotal text represents the first serious effort by Muthesius to define the elements of early modernist architecture according to notions of realism and simplicity. Although Muthesius is known best in Anglo-American architectural literature for his studies of the English house, his scholarship constituted a wide-ranging modernist polemic emanating from the German realist movement of the late 1890s. Notions that were introduced in *Style Architecture and Building Art* became common in later modernist historiography: disdain for the nineteenth century's artistic eclecticism and lack of originality; appreciation of the material and industrial aspects of building technology; and above all, a simpler approach to design. Muthesius's critique of stylistic architecture is not only linked to the development of the Deutsche Werkbund movement but also can be viewed more broadly as a cornerstone of the modern movement. In his introduction, Stanford Anderson situates Muthesius and his work in turn of the century architectural discourse and analyzes his vision of a new form of architecture. Anderson also discusses the rationale underlying the call for cultural renewal, the role of English architectural models in Muthesius's thought, critical differences between the first and second editions of *Style Architecture and Building Art*, the influence of the Jugendstil and Art Nouveau movements on Muthesius, and in turn, the influence of Muthesius on the Deutsche Werkbund movement.

Style-architecture and building-art Hermann Muthesius, 1916 *Pride in Modesty* Michelangelo Sabatino, 2011-05-21
Following Italy's unification in 1861, architects, artists, politicians, and literati engaged in volatile debates over the pursuit of national and regional identity. Growing industrialization and urbanization across the country contrasted with the rediscovery of traditionally built forms and objects created by the agrarian peasantry. *Pride in Modesty* argues that these ordinary, often anonymous, everyday things inspired and transformed Italian art and architecture from the 1920s through the 1970s. Through in-depth examinations of texts, drawings, and buildings, Michelangelo Sabatino finds that the folk traditions of the pre-industrial countryside have provided formal, practical, and poetic inspiration, directly affecting both design and construction practices over a period of sixty years and a number of different political regimes. This surprising continuity allows Sabatino to reject the division of Italian history into sharply delimited periods such as Fascist Interwar and Democratic Postwar and to instead emphasize the long, continuous process that transformed pastoral and urban ideals into a new modernist Italy.

Modern Architectural Theory Harry Francis Mallgrave, 2009-07-13 *Modern Architectural Theory* is the first book to provide a comprehensive survey of architectural theory primarily in Europe and the United States during three centuries of development. In this synthetic overview, Harry Mallgrave examines architectural discourse within its social and political context. He explores the philosophical and conceptual evolution of its ideas, discusses the relation of theory to the practice of

building and most importantly considers the words of the architects themselves as they contentiously shaped Western architecture He also examines the compelling currents of French rationalist and British empiricist thought radical reformation of the theory during the Enlightenment the intellectual ambitions and historicist debates of the nineteenth century and the distinctive varieties of modern theory in the twentieth century up to the profound social upheaval of the 1960s *Modern Architectural Theory* challenges many assumptions about architectural modernism and uncovers many new dimensions of the debates about modernism

Bruno Taut's Design Inspiration for the Glashaus David

Nielsen, 2015-09-16 As a formative exemplar of early architectural modernism Bruno Taut's seminal exhibition pavilion the Glashaus literally translated Glasshouse is logically part of the important debate of rethinking the origins of modernism However the historical record of Bruno Taut's Glashaus has been primarily established by one art historian and critic As a result the historical record of the Glashaus is significantly skewed toward a singular notion of Expressionism and surprisingly excludes Taut's diverse motives for the design of the building In an effort to clarify the problematic historical record of the Glashaus this book exposes Bruno Taut's motives and inspirations for its design The result is that Taut's motives can be found in yet unacknowledged precedents like the botanical inspiration of the *Victoria regia* lily the commercial interests of Frederick Keppler as the Director of the *Deutsche Luxfer Prismen Syndikat* and imitation that derived openly from the Gothic The outcome is a substantial contribution to the re-evaluation of the generally accepted histories of the modern movement in architecture

The Emergence of the Interior Charles Rice, 2006-11-22 Taking a radical position counter to many previous histories and theories of the interior domesticity and the home *The Emergence of the Interior* considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century It considers the interior's emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture's trajectories toward modernism The book argues that the interior emerged with a sense of doubleness being understood and experienced as both a spatial and an image-based condition Incorporating perspectives from architecture critical history and theory and psychoanalysis *The Emergence of the Interior* will be of interest to academics and students of the history and theory of architecture and design social history and cultural studies

Detailing Worlds Eric Bellin, 2025-02-06 In the 21st century the word detail appears constantly in discussions of building and we use it in many different ways yet just over 250 years ago detail meant nothing at all particular to the work of architects engineers or builders *Detailing Worlds* is the first book to examine the origins and evolution of detail as a concept with meanings specific to practices of building By exploring how past meanings and roles were ascribed to detail in different worlds of practice those of academics technicians students engineers and architects *Detailing Worlds* looks to the future illuminating the ways disciplinary knowledge and the concepts on which it is based evolve and change over time It is a story about how such concepts are slowly but constantly reconceived redefined and transformed by individuals as they interact

with one another and how this process is shaped by the ever changing sociocultural and technological dimensions of the world around us Richly illustrated with more than 200 images including figures from rare texts archival student drawings and practitioners construction documents from the 18th through 20th centuries Detailing Worlds ventures to tell the history of a disciplinary specific idea and offer insights about how we think and speak about the practice of building today
