Subject Knowledge Christopher J. Anstead,Ivor F Goodson,J. Marshall Mangan,2002-11-01 School knowledge has been a subject for historians notably in the field of history of education concentrating on the educational aspects of particular historical periods however links with contemporary education have often remained undeveloped This text attempts to account for the growth of increased interest by sociologists and others in school subjects since the 1960s Goodson s analysis of his own work in the UK and North America examines the range of insights afforded of the nature of schooling and teaching through the study of school subjects **Subject Knowledge and**

Teacher Education Viv Ellis,2007-04-05 Teachers knowledge of the subjects they teach has been of enduring interest to governments the profession and the wider society In this book Viv Ellis traces the development of three beginning teachers thinking about their subject knowledge in the context of Standards based teacher education and the practice of auditing student teachers subject knowledge Ellis puts forward a theory of subject knowledge development that moves on from the objectivist and individualistic epistemologies associated with Standards and the practices of auditing to more a contextualist and sociocultural understanding of teachers cognition and learning An important implication of this study is that if teacher education wishes to have greater impact on the development of beginning teachers teacher educators need to pay greater attention to the schools and subject department settings in which these beginning teachers learn **The Ministry of**

Education Film Experiment Alex Southern,2016-10-27 This book uncovers a unique post war film production programme and explores how this first British government intervention into visual education is relevant to film education today In 1943 the Ministry of Education took the decision to sponsor production of an experimental programme of nonfiction films specifically for the classroom Almost 70 years later the British Film Institute launched a new strategic development plan at the centre of which was the aim to prove the value of 21st century literacy to Government and embed film in the school curriculum This aim had been the focus of film education initiatives in previous decades without resolution Through archival research into original documents and the films The Ministry of Education Film Experiment builds a story of conflict and collaboration between the Ministry and the filmmakers offering an insight into why the struggle for government recognition of film education still remains **Examining Teach For All** Matthew A.M. Teach For All brings together research focused on Teach For All and its affiliate programmes to explore the organisation's impact on education around the world. Teach For All is an expanding global network of programmes in more than 50 countries that aim to radically transform education systems by recruiting talented graduates to teach for two years in under-resourced schools and developing them into lifelong advocates of reform. The volume offers nuanced insights into the interests and contexts shaping Teach For All and the challenges and possibilities inherent in broader efforts to enact education reform on a global scale. This volume is the first of its kind to present empirical research on the emergence and expansion of Teach For All programmes which replicate and adapt the Teach For America model around the world. The volume traces the network's expansion from its initial launch in 2007 to its growing international presence as chapters present new research from national contexts as diverse as Bangladesh, Lebanon, and Spain. Using evidence from a range of perspectives and research methodologies, the chapters collectively highlight the ways in which Teach For All and its affiliate programmes are working to alter educational landscapes worldwide. This book will be of great interest for scholars, educators, postgraduate students, and policymakers in the fields of comparative education, teacher education, education leadership, and education policy. It paves the way for future critical inquiry into this expanding global network as well as further investigations of educational change around the world.

Life Politics Ivor F. Goodson, 2011-10-23 This book on life politics comprises a collection of interviews and commentaries. The notion of life politics covers a number of different meanings within the book. Most importantly is the way that the genre of interviews helps cover a range of cultural contexts and intellectual milieu. Part of the life politics represented in this book is built around the belief that if we are to act as public intellectuals in the field of education and culture in the current globalised setting, we need to travel. This book shows how public intellectual work gets interrogated and implemented in different social and cultural settings.

Integrating Critical and Contextual Studies in Art and Design Jenny Rintoul, 2016-11-18 Integrating Critical and Contextual Studies in Art and Design examines the relationship between two aspects of art education that appear at times inseparable or even indistinguishable and at others isolated and in conflict: Critical and Contextual Studies (CCS) and studio practice. Underpinned by international contexts, this book is rooted in British art and design education and draws upon contemporary case studies of teaching and learning in post-compulsory settings in order to analyse and illustrate identities and practices of CCS and its integration. The chapters in this book are divided into three sections that build on one another: Discourse and debate, Models, types and tensions, and Proposals and recommendations. Key issues include knowledge hierarchies and subject histories and identities, constructions of theory, and the symbiotic relationship between theory and practice, models and practices of CCS within current post-compulsory British art and design education, the reification of ubiquitous terms in the fields of art and design, and of education, intuition and integration, approaches to curriculum integration including design and management, and suggestions for integrating CCS in art and design courses including implications for pedagogy and assessment.

Integrating Critical and Contextual Studies in Art and Design offers a comprehensive analysis of the current drive towards integration within art education and elucidates what we understand by the theory and practice of integration. It explores the history, theory, teaching and student experience of CCS and will be of interest to lecturers, teachers and pedagogues involved in art and design as well as researchers and students of art education.

Reflections on Language and Language Learning
 Marcel Bax, C. Jan-Wouter Zwart, 2001. In *Reflections on Language and Language Learning*. In honour of Arthur van Essen, thirty-one leading language scholars and educational linguists in the Netherlands and abroad with whom over the years Professor van Essen, one of the grandees of applied linguistics, has collaborated, provide original essays and studies which discuss the most recent insights and trends in the fields of linguistics and foreign language teaching. While interdisciplinary in scope, the volume encompasses theoretical advances in educational linguistic thinking. For example, the perceptive articles written by Michael Byram, Christopher N. Candlin, Natalia Gvishiani, Peter Jordens, Jan Koster, Leo van Lier and Bondi Sciarone, as well as a sample of the latest methodological developments in areas such as ELT, LSP and content-based language teaching, cases in point are the useful contributions by Jeanine Deen, Hilde Hacquebord, Michiel Goethals, Paul Meara, Ignacio Rodríguez Sánchez, Rosamond Mitchell, Christopher Brumfit and Uta Thörmel.

Cognitive Activation in the Mathematics Classroom and Professional Competence of Teachers
 Mareike Kunter, Jürgen Baumert, Werner Blum, Ute Klusmann, Stefan Krauss, Michael Neubrand, 2013-03-29. This work reports the findings of the Professional Competence of Teachers Cognitively Activating Instruction and Development of Students' Mathematical Literacy project. COACTIV applies a broad, innovative conceptualization of teacher competence to examine how mathematics teachers' knowledge, beliefs, motivational orientations and self-regulation skills influence their instructional practice and teaching outcomes. In this project, data was collected on various aspects of teacher competence and classroom instruction from the perspective of both the teachers themselves and their students. Moreover, it gauges the effects of these teacher characteristics on student learning as indexed by the progress students in each class. Questions addressed in the study, which are reported in this volume, include: What are the characteristics of successful teaching? What distinguishes teachers who succeed in their profession? How can the quality of instruction be improved?
