Subject Relations Naomi G. Rucker, Karen L. Lombardi, 1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company

Subject Relations Naomi G . Rucker, Karen L. Lombardi, 2018-10-24 Traditional psychoanalysis views relationships as forged through individual drives a satisfaction and fulfillment of needs and desires Rucker and Lombardi contend however that all relationships cannot be explained so simply rather they argue that human relationships carry meanings which cannot be reduced solely to the psychic contributions of each of the individuals involved Instead Subject Relations discusses the existence of a related unconscious rooted in mutual subjective experience The authors cite numerous clinical examples that show how the unconscious material generated by human interrelatedness comes to light Drawing on the work of Matte Blanco as well as traditional object relations theorists such as Melanie Klein D W Winnicott and Thomas Ogden the authors examine how identifications that exist through unconscious processes manifest themselves in psychoanalytic theory and practice

Psychodynamic Perspectives on Working with Children, Families, and Schools Michael O'Loughlin, 2012-12-08 With the push toward accountability and test performance in schools there has been a decline in emphasis on creativity imagination and feelings in schools Psychodynamic Perspectives on Working with Children Families and Schools is designed for students and professionals who are interested in restoring such values to their work with children There is an absence of psychoanalytic ways of thinking in conventional professional discourses of schooling With a few notable exceptions the discourses of child development classroom management early childhood education special education school psychology and school counseling have constructed notions of children and schooling that are often behaviorist instrumental and symptom focused Curriculum too often focuses on acquisition of knowledge and behaviors discipline is conceptualized as compliance and symptoms such as anger school resistance etc are pathologized and reacted to out of context children s special needs are often conceptualized instrumentally and children with complex psychological symptoms are delimited depersonalized or simply removed Professionals who work with children psychodynamically draw on diverse frameworks including the work of Anna Freud the long tradition of the Tavistock Clinic in London e g Anne Alvarez Susan Reid Margaret Rustin Frances Tustin etc the writings of Klein Winnicott and their colleagues French analysts e g Piera Aulagnier Didier Anzieu Laurent Danon Boileau Fran oise Dolto Maud Mannoni and Catherine Mathelin and Italian infant child analyst Alessandro Piontelli This work is valuable but often inaccessible to school professionals because the writing is somewhat specialized and because there is no tradition of teaching such work in professional preparation in those fields This collection is theoretically grounded in that the authors share a commitment to valuing children s emotions and understand the usefulness of psychoanalytic approaches for enhancing children s lives It is laden with examples to invite into this discussion those students and professionals who value these ideas but for whom this book may be their first introduction to progressive educational ideals and psychodynamic ways of working with children Psychodynamic Perspectives on Working with Children Families and Schools provides an
