Environmental Criminology Martin A. Andresen, 2014-03-14 The field of environmental criminology is a staple theoretical framework in contemporary criminological theory With this book Martin Andresen presents the first comprehensive and sole authored textbook on this influential and compelling school of criminological thought He covers a wide range of topics including the origins of environmental criminology the primary theoretical frameworks such as routine activity theory geometric theory of crime rational choice theory and the pattern theory of crime the practical application of environmental criminology an examination of how theories are operationalized and tested policy implications for the practice of crime prevention As well as these popular topics Andresen also discusses also a number of topics that are at the leading edge of research within environmental criminology This text will be ideal for courses on crime prevention where students are often encouraged to consider policy problems and apply theory to practice This book offers up environmental criminology as a theoretical framework for making sense of complex neighbourhood problems meaning that it will be perfect for modules on geography of crime crime analysis and indeed environmental criminology It would also be a good supplement for courses on criminological theory The Oxford Handbook of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2015-12 This

handbook presents a series of essays that captures not the past of criminology but where theoretical explanation is headed The volume is replete with ideas discussions of substantive topics with salient theoretical implications and reviews of literatures that illuminate avenues along which theory and research evolve **Offenders on Offending** Wim

Bernasco, 2013-01-11 Our knowledge of crime is based on three types of sources the criminal justice system victims and offenders For technological and other reasons the criminal justice system produces an increasing stream of information on crime The rise of the victimization survey has given the victims a much larger role in our study of crime There is however no concomitant development regarding offenders This is unfortunate because offenders are the experts when it comes to offending In order to understand criminal behavior we need their perspective This is not always a straightforward process however and information from offenders is often unreliable This book is about what we can do to maximise the validity of what offenders tell us about their offending Renowned experts from various countries present their experiences and insights with a clear focus on methodological issues of fieldwork among various types of offender populations Each contribution deals with with a few central issues How can offenders be motivated to participate in research How can offenders be motivated to tell the truth on their offending How can the information that offenders provide be checked and validated What can we learn from offenders that cannot be accessed from other sources With the aim of obtaining valid and reliable information how where and under which conditions should we observe offenders and talk to them *Communities and Crime* Pamela Wilcox, Francis T. Cullen, Ben Feldmeyer, 2018 This book provides an intellectual history that traces how varying images of community have evolved over time and influenced criminological thinking and criminal justice policy The authors outline the

major ideas that have shaped the development of theory research and policy in the area of communities and crime Each chapter examines the problem of the community through a defining critical or theoretical lens the community as social disorganization as a system of associations as a symptom of larger structural forces as a result of criminal subcultures as a broken window as crime opportunity and as a site of resilience Focusing on these changing images of community the empirical adequacy of these images and how they have resulted in concrete programs to reduce crime this book theorizes about and reflects upon why some neighborhoods produce so much crime The result is a tour of the dominant theories of place in social science today

Crime and Everyday Life Marcus Felson, Mary Eckert, 2015-01-29 Crime and Everyday Life Fifth Edition offers a bold approach to crime theory and crime reduction The text shows how crime opportunity is a necessary condition for illegal acts to occur The authors offer realistic often common sense ways to reduce or eliminate crime and criminal behavior in specific settings by removing the opportunity to complete the act Using a clear and engaging writing style author Marcus Felson and new co author Mary Eckert talk directly to the student about criminal behavior the routine activity approach and specific crime reduction ideas The authors emphasize how routine daily activities set the stage for illegal acts offering fascinating new ideas and examples not presented in earlier editions Most importantly this book teaches the student how to think about crime and then do something about it

Analysing Crime Data Alex Hirschfield, Kate Bowers, 2003-09-02 One of the key methods of reducing and dealing with criminal activity is to accurately gauge and then analyse the geographical distribution of crime from small scale to large scale areas Once the police and government know what areas suffer most from criminal activity they can assess why this is the case and then deal with it in the most effective way Crime mapping and the spatial analysis of crime data have become recognised as powerful tools for the study and control of crime Much of the emerging demand for more information and detailed crime pattern analysis have been driven by legislative changes such as the UK's new Crime and Disorder Act which has placed a joint statutory duty on Police Forces and Local Authorities to produce crime and disorder audits for their areas The book sets out methods used in the fields of Geographical Information Systems and highlights areas of best practice examines the types of problems to which spatial crime analysis can be applied reviews the capabilities and limitations of existing techniques and explores the future directions of spatial crime analysis and the need for training It centres on a series of case studies highlighting the experiences of academics and practitioners in agencies centrally involved in the partnership approach to crime prevention Practitioners and academics not only in the UK but also worldwide should be interested in the
