Snake's Pillow and Other Stories Zhu Lin, 1998-02-01 Jiangnan that part of east central China watered by the Yangzi River is the ironically Edenic setting for these six powerful tales of devotion betrayal and defilement Zhu Lin a uniquely angry female voice on China's literary scene takes a particular interest in the plight of young women whose exceptional qualities condemn them to exploitation by men No other contemporary Chinese writer renders the hostility of rural society toward women in such stark and ultimately tragic terms Serpents tyrannize the innocent in this fictional Jiangnan garden The title story refers to a fragrant blood red flower known as the snake's pillow which symbolizes an innocent girl betrayed and violated by a male figure of authority Immersed in the heady and sensual imagery of the natural world Zhu Lin's female protagonists invite comparisons not only with Eve but also with Thomas Hardy's Tess Zhu Lin has said of her fiction that its purpose is to summon the souls of readers who have lost themselves in the turbulence of a society in the transition to modernity and then to restore these lost souls to the bodies they have left An evocation of both flesh and spirit these Jiangnan stories give voice to the complex and disturbing experience of women in a changing society The Fear of Snakes Nobuyuki Kawai, 2019-09-05 This book provides a series of compelling evidence that shows that humans have innate fear of snakes Building on the previous studies on the Snake Detection Theory SDT the author presents a summary of psychological and neuropsychological experiments to explain the fear of snakes in humans and primates Readers will come to understand why and how we are afraid of snakes from an evolutionary perspective The first half of the book discusses the history of psychological behaviorism and neobehaviorism The latter half of the book consists mainly of the experimental studies performed by the author with a focus on three key items First compared with other animals snakes especially draw the attention of primates and humans Second the ability of primates and humans to recognize snakes with particular efficiency Third processing mechanisms within the brain for snake detection is discussed from a new viewpoint The book offers a unique resource for all primatologists psychologists neuroscientists anthropologists herpetologists and biologists who are interested in the evolution of visual and cognitive systems mechanisms of fear snakes or primates **Spring Flowers** Chester Arthur Darling, 1913 **"A" General History of the Dichlamydeous Plants** George Don, 1834 A General System of Gardening and Botany George Don, 1834 Botanical Index to All the Medicinal Plants, Barks, roots, seeds and Flowers Usually Kept by Druggists Arranged in Alphabetical Order Allan Pollock, 1874 **A General History of the Dichleamydeous Plants ...
