Methods of Mathematical Oncology Takashi Suzuki, Clair Poignard, Mark Chaplain, Vito Quaranta, 2021-08-21 This book presents original papers reflecting topics featured at the international symposium entitled Fusion of Mathematics and Biology and organized by the editor of the book The symposium held in October 2020 at Osaka University in Japan was the core event for the final year of the research project entitled Establishing International Research Networks of Mathematical Oncology The project had been carried out since April 2015 as part of the Core to Core Program of Japan Society for the Promotion of Science JSPS In this book the editor presents collaborative research from prestigious organizations in France the UK and the USA By utilizing their individual strengths and realizing the fusion of life science and mathematical science the project achieved a combination of mathematical analysis verification by biomedical experiments and statistical analysis of chemical databases Mathematics is sometimes regarded as a universal language It is a valuable property that everyone can understand beyond the boundaries of culture religion and language This unifying force of mathematics also applies to the various fields of science Mathematical oncology has two aspects i e data science and mathematical modeling and definitely helps in the prediction and control of biological phenomena observed in cancer evolution The topics addressed in this book represent several methods of applying mathematical modeling to scientific problems in the natural sciences Furthermore novel reviews are included that may motivate many mathematicians to become interested in biological research *Machine Learning, Low-Rank Approximations and Reduced Order Modeling in*

Computational Mechanics Felix Fritzen, David Ryckelynck, 2019-09-18 The use of machine learning in mechanics is booming Algorithms inspired by developments in the field of artificial intelligence today cover increasingly varied fields of application

This book illustrates recent results on coupling machine learning with computational mechanics particularly for the construction of surrogate models or reduced order models The articles contained in this compilation were presented at the EUROMECH Colloquium 597 Reduced Order Modeling in Mechanics of Materials held in Bad Herrenalb Germany from August 28th to August 31th 2018 In this book Artificial Neural Networks are coupled to physics based models The tensor format of simulation data is exploited in surrogate models or for data pruning Various reduced order models are proposed via machine learning strategies applied to simulation data Since reduced order models have specific approximation errors error estimators are also proposed in this book The proposed numerical examples are very close to engineering problems The reader would find this book to be a useful reference in identifying progress in machine learning and reduced order modeling for computational mechanics OSRD, Reports: Bibliography and Index of Declassified Reports Having ORSS Numbers
