Expatriates James Wesley, Rawles, 2013-10-01 In the latest survivalist thriller from founder of survivalblog com and New York Times bestselling author James Wesley Rawles two expat families struggle for their very survival in the midst of a global economic collapse When the United States suffers a major socioeconomic collapse a power vacuum sweeps the globe A newly radicalized Islamic government rises to power in Indonesia invades the Philippines East Timor Papua New Guinea and finally northern Australia No longer protected by American military interests Australia must repel an invasion alone In the thick of these political maneuvers an American family of missionaries living in the Philippines and a Texan petroleum engineer in Australia must face the fear of being strangers in a world in flux Are their relatives back home healthy and safe Will they ever

see them again In its depiction of the authentic survivalist skills and techniques needed to survive a global socioeconomic meltdown *Expatriates* is as informative as it is suspense filled *Increasing Small Arms Lethality In Afghanistan: Taking Back The Infantry Half-Kilometer* Major Thomas P. Ehrhart, 2015-11-06 Operations in Afghanistan frequently require United States ground forces to engage and destroy the enemy at ranges beyond 300 meters These operations occur in rugged terrain and in situations where traditional supporting fires are limited due to range or risk of collateral damage With these limitations the infantry in Afghanistan require a precise lethal fire capability that exists only in a properly trained and equipped infantryman While the infantryman is ideally suited for combat in Afghanistan his current weapons doctrine and marksmanship training do not provide a precise lethal fire capability to 500 meters and are therefore inappropriate Comments from returning non commissioned officers and officers reveal that about fifty percent of engagements occur past 300 meters The enemy tactics are to engage United States forces from high ground with medium and heavy weapons often including mortars knowing that we are restricted by our equipment limitations and the inability of our overburdened soldiers to maneuver at elevations exceeding 6000 feet Current equipment training and doctrine are optimized for engagements under 300 meters and on level terrain There are several ways to extend the lethality of the infantry A more effective 5.56 mm bullet can be designed which provides enhanced terminal performance out to 500 meters A better option to increase incapacitation is to adopt a larger caliber cartridge which will function using components of the M16/M4 The 2006 study by the Joint Service Wound Ballistics Integrated Product Team discovered that the ideal caliber seems to be between 6.5 and 7 mm This was also the general conclusion of all military ballistics studies since the end of World War I *The Barrett Rifle* Chris McNab, 2016-03-24 The Barrett M82A1 and its derivatives are among the most successful sniping rifles ever manufactured Now entering its fourth decade of service the short recoil semi automatic system is capable of firing a devastating 50 caliber round with lethal accuracy over distances of more than 2km Unconfirmed reports from Afghanistan in 2012 accredit the Barrett with one of history's longest ever kills at 2,815m This is the technical history of a rifle initially developed as a sporting firearm but which evolved into a long range sniping rifle and a formidable military anti materiel tool designed to neutralize everything from enemy vehicles to parked aircraft Adopted by snipers across the world the Barrett rifles have seen active service in Operation Desert Storm Iraq and Afghanistan and have become an important addition to police armed services and Special Forces units alike *Enemy Inside The Gates: Snipers In Support Of Military Operations In Urbanized Terrain* Lt.-Colonel Jeffery E. Dearolph USMC, 2014-08-15 As the world's urban areas continue to increase in size the possibility of U.S. forces conducting military operations in urbanized terrain also increases However the weapon systems the U.S. procures and employs obtain maximum effectiveness in open terrain These weapons prove less capable in urban terrain since their standoff and precision advantages suffer degradation due to buildings and the fleeting nature of enemy personnel U.S. weaponry also causes a large amount of collateral damage that may also result in civilian casualties

which proves politically unacceptable Potential adversaries of the U S realize these limitations and present a target set that proves difficult to locate and engage The target set the enemy uses in urban terrain consists of enemy combatants mixing with non combatants enemy snipers and special purpose teams Assets the U S possesses that can engage elements of the enemy s urban target set include U S Army and Marine Corps snipers However a determination on whether more snipers will effectively defeat the target set requires consideration This monograph analyzes the contemporary operating environment to articulate the enemy s urban target set Next a review of current U S Army and Marine Corps sniping doctrine organization and training establishes the foundation for presenting the sniper s capability to defeat the urban target set In order to provide a balanced argument other possible solutions to engaging and defeating the target set receive consideration Research shows that the sniper company organized at the division level achieves the desired effect of increasing the density of sniper teams on the urban battlefield The costs associated with the sniper company prove acceptable as it requires minimal expenditure concerning personnel and equipment The division sniper company will effectively counter the enemy s urban target set without causing non combatant casualties

Understanding International Counter Terrorism Axel Hunsicker, 2006 Understanding of Operational Counter Terrorism is one serious effort to lay out a comprehensive strategy of how to deal with a whole gamut of possible terrorist incidents by using a language that any person or first responders like policemen security personnel firemen paramedics etc can understand This guide covers everything from bombings and hostage taking to NBC Nuclear Biological and Chemical Terrorism what needs to be done before during and after an event This manual combines what minimally needs to be understood about Operational Counter Terrorism by the government level policy maker while at the same time helping the

personnel on the first responder level who are planning to cope with what must at least initially seem like an overwhelming attack Terrorism is global and any part of this guide can easily be adapted and translated to any region law and government in the world This manual should make clear that the only way to effectively deal with terrorism is to have a thorough understanding of its present day characteristics such as who is involved and what weapons and tactics are the terrorists likely to be using The players on the Counter Terrorism team need to take stock of what is in their tool boxes what works and what is required what new capabilities need to be developed in order to face not only today s terrorist but also tomorrow s as well
