With only 4,000 left in the wild, Snow Leopards are included in the list of endangered species.

Poaching and climate change are on top of the reasons why Snow Leopards are gradually disappearing. And several groups and organizations are stepping up to help stop poaching and reduce the effects of global warming.

Fundamental Problem Nicholas Maxwell,2020-06-03 How can the world we live in and see touch hear and smell the world of living things people consciousness free will meaning and value how can all of this exist and flourish embedded as it is in the physical universe made up of nothing but physical entities such as electrons and quarks How can anything be of value if everything in the universe is ultimately just physics In *Our Fundamental Problem* Nicholas Maxwell argues that this problem of reconciling the human and physical worlds needs to take centre stage in our thinking so that our best ideas about it

interact with our attempts to solve even more important specialized problems of thought and life When we explore this fundamental problem Maxwell argues revolutionary answers emerge for a wide range of questions arising in philosophy science social inquiry academic inquiry as a whole and most important of all our capacity to solve the global problems that threaten our future climate change habitat destruction extinction of species inequality war pollution of earth sea and air An unorthodox introduction to philosophy Our Fundamental Problem brings philosophy down to earth and demonstrates its vital importance for science scholarship education life and the fate of the world

Extraordinary Questions Allyn David McAuley, 2010-09 These irreconcilable tensions derive from the same source from the failure of Western rationalism to erect a solid house on a solid foundation as it promised it would That is Western philosophy promised an elegant structure with the top floor comprised of the gracious rooms for human living the space where man lives happily with man because he understands the cosmic necessity of the moral truths he knows surely what he and his fellow man should do to be fulfilled and happy in the most sublime sense of happiness The discovery by rational science that man is an historical and biological accident convinced the philosopher that moral truths must be relative to unsupported human choice and therefore that our moral certainty would have to be derived from the non scientific realm of faith the realm of religion and art the realm of the non rational Today the good news is that this problem is really almost academic as they say From the late nineteenth century through most of the twentieth the failure of Western rationalism created a great outpouring of thought and expression from thinkers artists scientists and ordinary intellectuals Even the great world wars were often understood in light of this issue Today all is quiet on the Western front The vacuum left by the failure of Western rationalism in regard to human morality seems to have been filled quite nicely by the Judeo Christian and Islamic religions and perhaps they always carried most of the burden for most of us anyway Only in the hallowed halls of our academies if there do earnest students and professors argue over the foundations of human thought and action Now that things are quiet and old controversies are largely ignored if not exactly laid to rest it might be enjoyable to start thinking again For when the entertainment is over and one is alone the mind turns to reflection In this collection of essays Allyn McAuley explores many of the largest themes in Western philosophy from a fresh perspective He believes that both primary branches of contemporary philosophy have lost the original animating spirit of Western thought and attributes this to their implicit acceptance of modern moral relativism Advocating a return to the naive questioning characteristic of our native intelligence the author examines popular views on such diverse issues as abortion ethics the Internet and human freedom extraterrestrial intelligence business theory and international human rights He moves from these topical reflections to offer thoughts on extraordinary questions that he believes are beyond the mastery of any philosopher yet demand the attention of all thinking men and women questions on the nature of truth beauty love happiness and the immortality of the human soul McAuley concludes with the contention that philosophy by itself is insufficient and that the scientific impulse must be supplemented by the artistic sensibility in order to yield true

understanding and therefore happiness the goal of human life **Our Environmental Handprints** Jon R.
