one in five American women between the ages of forty and forty four is childless and half of those women say they wish they could have children Richards offers a hopeful message women approaching the end of their baby-making days do not need to settle and even twentysomethings who want to prolong their dating years do not need to fret Richards tells the history of this controversial science from its moments of premature enthusiasm to the exciting race that led to the big breakthroughs She also explores the hard facts of egg freezing from the cost and practical obstacles to the probabilities of success Above all she shares the stories of these women and especially her own with emotional honesty and compassion and makes the journey for all ultimately redeeming
